## Approach to the Psychiatric Patient

*Case-Based Essays, Second Edition*

Edited by John W. Barnhill, M.D.

This book is unique in its structural design, multidisciplinary focus, and intellectual rigor. Each of the 10 chapters begins with a composite case followed by about 10 essays written by eminent mental health experts. This new edition follows the format that made the first edition so successful; however, all the essays have been updated to include recent developments in the field and to be compatible with DSM-5. New contributions include essays on such topics as depression biomarkers, family issues in schizophrenia, wellness, and co-occurring anxiety and substance use disorders. The 10 cases span a broad diagnostic spectrum, from mood instability (case 3) to terminal illness (case 5) to hypomania (case 9). The 126 authors were each asked to provide incisive “curbside consults” that could be read on the fly or during more contemplative moments by mental health clinicians and other readers interested in the art of modern psychiatry.

## Handbook of Mentalizing in Mental Health Practice, Second Edition

Edited by Anthony W. Bateman, M.A., FRCPsych, and Peter Fonagy, Ph.D., F.B.A.

Of utmost importance to practitioners, this book provides coherent, tried-and-tested approaches to both common and hard-to-treat conditions. In addition, the authors present a conceptual framework for clinicians who are helping patients to consider their own thoughts and feelings and to differentiate them from the perspectives of others. This pioneering model helps clinicians to understand the social processes embedded in relationships between parents and children, the experience of childhood adversity, and the nature of learning within interpersonal communication—as well as an understanding of the emergence and maintenance of mental disorder.

2019 • 496 pages • ISBN 978-1-61537-140-2 • Paperback • \$82.00, £61.00 • Item #37140

COMING  
MARCH 2019!

## Evidence-Based Treatment Approaches for Suicidal Adolescents

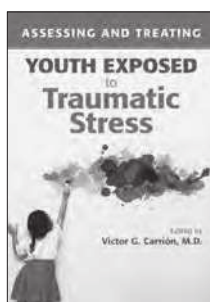

*Translating Science into Practice*

Edited by Michele Berk, Ph.D.

The goal of this book is to provide clinicians with a review of the existing evidence-based psychotherapy approaches for the treatment of suicidal adolescents, along with practical guidelines for how to implement these approaches in their practices. In service of that objective, the book includes a chapter, written by the treatment developer(s), on each of the six treatments that have been shown in randomized controlled trials to reduce suicidal and/or self-harm behavior in adolescents with prior histories of these behaviors. The six treatments described are dialectical behavior therapy, mentalization-based therapy, cognitive-behavioral therapy for co-occurring suicidal behavior and substance use, multisystemic therapy, attachment-based family therapy, and the Safe Alternatives for Teens and Youths (SAFETY) program.

## Assessing and Treating Youth Exposed to Traumatic Stress

Edited by Victor G. Carrión, M.D.

The book provides clinicians with the information and tools they need to assess and treat children and young people who have experienced trauma. The first half of the book focuses on assessment and treatment, emphasizing that the population with posttraumatic stress disorder is highly diverse in terms of presentation and target symptoms and that comorbidities are the norm rather than the exception. Current treatments are explored, from the mainstream, such as psychotherapy, to the alternative, such as mindfulness and yoga. Finally, associated clinical issues, such as substance use and sleep disorders, are addressed, and the book concludes with chapters addressing systems of care, including full-spectrum and integrated models.

## Applied Mindfulness

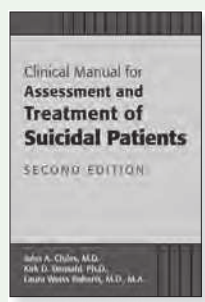

*Approaches in Mental Health for Children and Adolescents*

Edited by Victor G. Carrión, M.D., and John Rettger, Ph.D.

This is a tool for mental health clinicians who work with children, adolescents, and transitional-age youth. The book is premised on the truth that teaching mindfulness is not a skill that can be picked up by reading an instructional manual; clinicians must first practice mindfulness themselves. Divided into four parts, the book begins with an introduction to clinical mindfulness that addresses the current state of the field and provides an essential knowledge foundation for working with youth. The next part offers mindfulness strategies and protocols directed toward specific clinical scenarios, and in the following two parts, the authors consider how mindfulness can help specific patient populations who struggle with traumatic events. The final part offers examples of how to integrate mindfulness into a variety of settings, including home, work, school, and the natural world.

## Clinical Manual for the Assessment and Treatment of Suicidal Patients, Second Edition

John A. Chiles, M.D., Kirk D. Strosahl, Ph.D., and Laura Weiss Roberts, M.D., M.A.

This new edition provides current, competent, and compassionate information for clinicians dealing with potentially suicidal patients. Challenging the underlying assumption that suicidal behavior can be predicted and controlled, the authors conceptualize suicidality as problem-solving behavior to which an individual resorts when other options seem to have failed. When the assumption is that a patient's suicidal behavior represents his or her best attempt to deal with life's difficulties at that moment, a different model of intervention emerges, one the authors address in detail. Cognizant of the time and productivity pressures experienced by today's clinicians, the authors provide checklists, tables, and patient assessment tools, as well as case examples that model clinician-patient interactions. The key concepts are summarized at the end of each chapter, and tips for success are highlighted throughout the text.

## Aggression

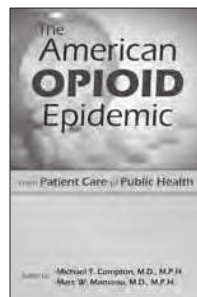

*Clinical Features and Treatment Across the Diagnostic Spectrum*

Edited by Emil F. Coccaro, M.D., and Michael S. McCloskey, Ph.D.

The book provides mental health clinicians with a full understanding of both primary aggression and aggression as it manifests in other psychiatric disorders. The contributors explore the forms and types of aggression and its possible causative factors (such as psychobiological abnormalities involving neurochemistry and neural circuits, genetics, epigenetics, and environment), as well as assessment, clinical approaches, and treatments (both psychotherapeutic and psychopharmacological). Case vignettes help the reader to understand and contextualize the presented information in a clinically relevant fashion.

## The American Opioid Epidemic

*From Patient Care to Public Health*

Edited by Michael T. Compton, M.D., M.P.H., and Marc W. Manseau, M.D., M.P.H.

The book presents the best of science and clinical practice and how these can inform public policy and the mental health professions. The editors have assembled a roster of brilliant clinicians and academicians, who offer insight into the myriad medical, legal, and socioeconomic facets of this growing problem. Together, they provide an up-to-date review of all aspects of the crisis, including social determinants of the crisis, recent trends in heroin use, prescription analgesic opioid use and misuse, unintentional overdose, psychiatric and medical comorbidities, assessment of and care for individuals with opioid use disorder, medication-assisted treatment, psychosocial interventions, prevention and policy approaches to the epidemic, harm reduction, and treatment quality and outcome measurement.

## Practical Strategies in Geriatric Mental Health Cases and Approaches

Edited by Laura B. Dunn, M.D., and Erin L. Cassidy-Eagle, Ph.D.

**Contents:** Preface. Late-Life Depression I: "I can't keep up with my grandkids". Late-Life Depression II: "I think of ending my life every day.". Working with Depressed Caregivers: Behavioral Activation: "I can't find the energy or time to leave the house". Diagnosis and treatment of Generalized Anxiety Disorder in later life: "Getting old is not for wimps!". Somatic Complaints and Anxiety in Older Adults: "I wish the doctor would figure out what's wrong with me". Pain and psychological factors in older adults: "I need more pain medication, not less!". Primary sleep disorders: "My wife says I snore loudly and sometimes stop breathing while I'm asleep". Evaluation and Management of Insomnia: "My sleeping pill isn't working anymore". Bipolar Disorder: "What's wrong with Mom—is it dementia?". Post-Traumatic Stress Disorder: "My stomach hurts". Evaluation and treatment of substance use disorders: "I just have one drink with dinner, Doc". Mild cognitive impairment: "I'm forgetting things. Is this normal for my age, or do I have dementia?". Neuropsychological Testing: "I sometimes forget things". Behavioral and psychological symptoms of dementia: "Little men are invading my backyard". Delirium in older adults: "Me, confused? Nah!". Inpatient issues - behavioral and pharmacologic interventions: "He tried to kick a staff member". Post-Intensive Care Syndrome: "He's just not himself.". Physical activity in late life: "I run out of breath".

## Beyond PTSD

*Helping and Healing Teens Exposed to Trauma*

Edited by Ruth Gerson, M.D., and  
Patrick Heppell, Psy.D.

Foreword by Bruce D. Perry, M.D., Ph.D.

Traumatic stress in teens can masquerade as behavioral problems, academic issues, self-destructive behaviors, substance use, or even psychosis. This book bridges the gaps between existing trauma manuals and textbooks by giving readers a more complete understanding of the teen's perspective. It provides concrete strategies for talking to and engaging teens, as well as for finding the most appropriate evidence-based treatment for them. The first of two parts tackles specific symptoms, including aggression, self-injury, and school refusal. The second part focuses on working with traumatized youth in diverse systems, from schools and hospitals to juvenile justice facilities and pediatric offices.

Throughout, tables compare different types of trauma therapies and provide information about how treatments might be adapted to fit a specific teen or setting.

## Black Mental Health

### *Patients, Providers, and Systems*

Edited by Ezra E. H. Griffith, M.D.,  
Billy E. Jones, M.D., M.S., and  
Altha J. Stewart, M.D.

The book examines the role of African Americans within American psychiatric health care from distinct but interconnected perspectives. The black practitioner experience is revealed in eye-opening detail in the first-person accounts that open the volume, in which senior African American psychiatrists—including the first black president of the American Psychiatric Association, Dr. Altha J. Stewart—describe their journeys to professional prominence. The book also devotes a part to the training of black psychiatrists, including their representation in the field, the effects of implicit bias, and the role of historically black colleges and universities in the delivery of psychiatric services. These chapters on the professional experience find their counterpoint in parts that focus on the complexities of and opportunities for delivering mental health care to various subsets of the black population, including women, children, and LGBTQ individuals. Here readers will find a robust discussion of methods for reducing racial and ethnic disparities in access to effective treatment, as well as an examination of research that is relevant to the care of the black population.

## Family Murder

### *Pathologies of Love and Hate*

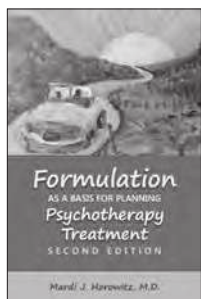

Edited by Susan Hatters Friedman, M.D.  
Group for the Advancement of Psychiatry

This book draws on both real-life cases and research data to study the commonalities, differences, and society's misconceptions about the various forms of murder within the family. Ten forensic psychiatrists, who among them have interviewed hundreds of perpetrators and thousands of individuals affected by family violence, shed new light on crimes such as intimate partner homicide, feticide, child murder by parents, and siblicide as they examine epidemiology and public health implications, the motivations for each subtype of family murder, psychiatric assessment issues, means of prevention of these crimes, and the aftermath. With a case-based learning approach that is supplemented by expert analysis, the book brings together an amount of detailed research and psychiatric experience about every type of murder in the family that is unrivaled by any other single source.

## Formulation as a Basis for Planning Psychotherapy Treatment, Second Edition

Mardi J. Horowitz, M.D.

This edition provides clinicians with a theoretical framework that helps them identify a patient's most salient problems and then devise objectives for addressing these problems over progressive phases of treatment. The book presents a formulation system that combines concepts derived from psychodynamic, interpersonal, cognitive-behavioral, and family system approaches to fill the gap between diagnosis and treatment planning. This edition retains step-by-step presentation and case-based learning that distinguished the previous volume.

## Pocket Guide for the Assessment and Treatment of Eating Disorders

Edited by James Lock, M.D., Ph.D.

This is a practical guide designed to help the busy clinician quickly find the most relevant and up-to-date information about how to evaluate, diagnose, and treat people with eating disorders. Although the book was written with the nonspecialist in mind, it is also useful for those who regularly treat eating disorders but who want a pocket reference and guide. Students in colleges, graduate programs, and postgraduate programs will also find this book an excellent primer on the presentation, epidemiology, risk factors, and major treatment approaches for eating disorders across the age spectrum. Much of the information is presented in table and figure form, highlighting the main points related to diagnosis and treatment and the most salient and relevant content for clinical management.

## Principles and Practice of Electroconvulsive Therapy

Keith G. Rasmussen, M.D.

The manual begins with a summary on what ECT is and a brief history of the treatment. It then guides readers through the typical course of ECT, from patient selection and consent to treatment management and side effect mitigation. The book also provides an examination of other neuropsychiatric stimulation therapies in relation to ECT and explains how to choose among them. All chapters conclude with key points that summarize the most salient ideas. Readers seeking to further educate themselves on ECT will also benefit from the exhaustive reference list.

## Textbook of Traumatic Brain Injury, Third Edition

Edited by Jonathan M. Silver, M.D., Thomas W. McAllister, M.D., and David B. Arciniegas, M.D.

Keeping pace with advances in the diagnosis, treatment, and science of TBI, this edition, comprehensively fills this gap in knowledge. Nearly all 50 chapters feature new authors, all of them experts in their field. Chapters new to this edition include biomechanical forces, biomarkers, neurodegenerative dementias, suicide, endocrine disorders, chronic disease management, and social cognition. An entirely new section is devoted to the evaluation and treatment of mild TBI, including injuries in athletes, military service members and veterans, and children and adolescents. These chapters join newly updated sections on the assessment and treatment of the cognitive, emotional, behavioral, and other physical sequelae of TBI.

## DSM LIBRARY

## Understanding Mental Disorders

Your Guide to DSM-5®

American Psychiatric Association

*Understanding Mental Disorders: Your Guide to DSM-5®* is a consumer guide for anyone who has been touched by mental illness.

Based on the DSM-5®—*Understanding Mental Disorders* provides valuable insight on what to expect from an illness and its treatment—and will help readers recognize symptoms, know when to seek help, and get the right care. Featured disorders include depression, schizophrenia, ADHD, autism spectrum disorder, posttraumatic stress disorder, and bipolar disorder, among others.

2015 • 388 pages • ISBN 978-1-58562-491-1  
Paperback • \$24.95, £18.99 • Item #62491

eBook • \$19.95, £14.99 • Item #37019

## DSM-5® Repositionable Page Markers

American Psychiatric Association

The DSM-5® Repositionable Page Markers are designed to help you quickly and easily locate key information within DSM-5®. The markers are made with a non-permanent adhesive and may be repositioned within your manual at any time.

2013 • 1 page • ISBN 978-0-89042-558-9  
Repositionable Page Markers • \$12.50, £8.99 • Item #2558

Available Online at  
PsychiatryOnline.org

## Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition (DSM-5®)

American Psychiatric Association

This manual, which creates a common language for clinicians involved in the diagnosis of mental disorders, includes concise criteria intended to facilitate an objective assessment of symptom presentations in a variety of clinical settings—inpatient, outpatient, partial hospital, consultation-liaison, clinical, private practice, and primary care. DSM-5® is the most comprehensive, current, and critical resource for clinical practice available to today's mental health clinicians and researchers.

INCLUDES  
ICD-10-CM CODES!

## DSM-5 Diagnostic Criteria Mobile App

American Psychiatric Association

The *DSM-5® Diagnostic Criteria Mobile App* is designed to help users fully integrate the new DSM criteria and codes into their practice and study. Users have full offline access to all of the criteria sets as well as online access to supporting videos, commentary and resources. Powerful search and customization tools aid and enhance assessment of symptom presentations in a variety of clinical and administrative settings. It features:

- Access to the complete DSM-5 diagnostic criteria sets on your phone and tablet
  - Up to date access to ICD-9-CM and ICD-10-CM codes for clinical and administrative use
- Available for both iOS and Android compatible devices through iTunes store and Google Play.

## DSM-5® Clinical Cases

Edited by John W. Barnhill, M.D.

This brings DSM-5® to life through engaging narratives of every disorder. The book emphasizes the diagnostic concerns of severity, dimensionality, culture, age and development, and gender. Each case is presented by an expert who concludes with a discussion of the context of the diagnosis.

2014 • 402 pages • ISBN 978-1-58562-468-3

## DSM-5® Guidebook

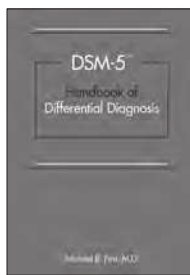

The Essential Companion to the Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition

Donald W. Black, M.D.,  
and Jon E. Grant, M.D., M.P.H., J.D.

The book serves two critical functions. First, it acts as a guide for busy clinicians in need of practical information on the use of diagnostic criteria and codes, documentation, and compensation. Second, it serves as an educational text and includes a structured curriculum that facilitates its use in courses and workshops.

2014 • 567 pages • ISBN 978-1-58562-465-2  
Paperback • \$75.00, £56.00 • Item #62465

2014 • 567 pages • ISBN 978-1-58562-532-1  
eBook • \$60.00, £44.00 • Item #62532

## DSM-5® Handbook of Differential Diagnosis

Michael B. First, M.D.

The book helps improve skills in formulating a comprehensive differential diagnosis by providing a variety of approaches. These include a six-step diagnostic framework, 29 bottom-up “decision trees”, and 66 differential diagnosis tables for use once a tentative diagnosis has been made.

2014 • 338 pages • ISBN 978-1-58562-462-1  
Paperback • \$95.00, £70.00 • Item #62462

2014 • 338 pages • ISBN 978-1-58562-998-5

## Structured Clinical Interview for DSM-5® Disorders (SCID-5-CV), Clinician Version

Michael B. First, M.D.,  
Janet B. W. Williams, Ph.D.,  
Rhonda S. Karg, Ph.D.,  
and Robert L. Spitzer, M.D.

SCID-5-CV guides the clinician step-by-step through the DSM-5 diagnostic process. Interview questions are provided conveniently along each corresponding DSM-5 criterion, which aids in rating each as either present or absent.

2016 • 94 pages • ISBN 978-1-58562-461-4  
Paperback (package of 5) • \$84.00, £62.00  
Item #62461

## User's Guide to Structured Clinical Interview for DSM-5 Disorders (SCID-5-CV), Clinician Version

Michael B. First, M.D.,  
Janet B. W. Williams, Ph.D.,  
Rhonda S. Karg, Ph.D.,  
and Robert L. Spitzer, M.D.

This provides comprehensive instructions on how to use the SCID-5-CV effectively and accurately. It not only describes the rationale, structure, conventions, and usage of the SCID-5-CV, but also discusses in detail how to interpret and apply the specific DSM-5 criteria for each of the disorders.

2016 • 170 pages • ISBN 978-1-58562-524-6  
Paperback • \$85.00, £63.00 • Item #62524

## Set of SCID-5-CV and SCID-5-CV Users' Guide

Set • \$144.00, £107.00 • Item #5104

## Structured Clinical Interview for DSM-5® Personality Disorders (SCID-5-PD)

Michael B. First, M.D.,  
Janet B. W. Williams, Ph.D.,  
Lorna Smith Benjamin, Ph.D.,  
and Robert L. Spitzer, M.D.

SCID-5-PD is a semistructured diagnostic interview for clinicians and researchers to assess the 10 DSM-5 Personality Disorders across Clusters A, B, and C, as well as Other Specified Personality Disorder. The SCID-5-PD includes the *Structured Clinical Interview for DSM-5® Screening Personality Questionnaire* (SCID-5-SPQ).

2016 • 52 pages • ISBN 978-1-58562-474-4  
Paperback (package of 5) • \$77.00, £57.00 • Item #62474

## User's Guide for the Structured Clinical Interview for DSM-5 Personality Disorders (SCID-5-PD)

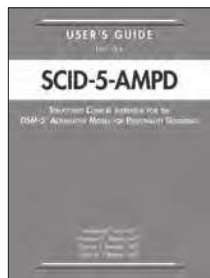

Michael B. First, M.D.,  
Janet B. W. Williams, Ph.D.,  
Lorna Smith Benjamin, Ph.D.,  
and Robert L. Spitzer, M.D.

This contains essential guidance for use of the SCID-5-PD, and the optional SCID-5-SPQ can serve as a brief, 20-minute self-report screening tool to reduce the time of the SCID-5-PD clinical interview.

2016 • 106 pages • ISBN 978-1-58562-475-1  
Paperback • \$81.00, £60.00 • Item #62475

### Set of SCID-5-PD and SCID-5-PD User's Guide

Set • \$134.00, £99.00 • Item #5105

## User's Guide for the Structured Clinical Interview for the DSM-5® Alternative Model for Personality Disorders (SCID-5-AMPD)

Michael B. First, M.D., Andrew E. Skodol, M.D.,  
Donna S. Bender, Ph.D., and John M. Oldham, M.D.

The paramount tool for the use of SCID-5-AMPD, this provides readers with an essential manual to effectively understand and use any SCID-5-AMPD module. Integrating an overview of the DSM-5 Alternative Model, this companion guide provides instructions for every SCID-5-AMPD module and features completed samples of all modules in full, with corresponding sample patient cases and commentary. The modular format of the SCID-5-AMPD allows the researcher or clinician to focus on those aspects of the Alternative Model of most interest.

2018 • 251 pages • ISBN 978-1-61537-050-4  
Paperback • \$85.00, £63.00 • Item #37050

## Structured Clinical Interview for the DSM-5® Alternative Model for Personality Disorders (SCID-5-AMPD) Module I

Level of Personality Functioning Scale

Donna S. Bender, Ph.D., Andrew E. Skodol, M.D.,  
Michael B. First, M.D., and John M. Oldham, M.D.

*Module I* is devoted to the linchpin of dimensional assessment—self and interpersonal functioning—using the Level of Personality Functioning Scale. *Module I* provides both a global functioning score and an innovative, detailed assessment of all four domains of functioning (Identity, Self-Direction, Empathy, and Intimacy) and their corresponding subdomains.

2018 • 40 pages • ISBN 978-1-61537-183-9  
Paperback (package of 5) • \$80.00, £59.00  
Item #37183

## Structured Clinical Interview for the DSM-5® Alternative Model for Personality Disorders (SCID-5-AMPD) Module II

Personality Traits

Andrew E. Skodol, M.D., Michael B. First, M.D.,  
Donna S. Bender, Ph.D., and John M. Oldham, M.D.

*Module II* focuses on the dimensional assessment of the five pathological personality trait domains in the Alternative Model and their corresponding 25 trait facets. This comprehensive review of the trait domains (Negative Affectivity, Detachment, Antagonism, Disinhibition, and Psychoticism) identifies multiple areas of personality variation and provides a visual profile of trait facets across the trait domains.

Set • \$208.00, £154.00 • Item #5111

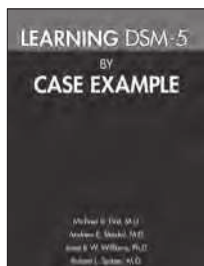

## Structured Clinical Interview for the DSM-5® Alternative Model for Personality Disorders (SCID-5-AMPD) Module III

Personality Disorders (Including Personality Disorder-Trait Specified)

Michael B. First, M.D., Andrew E. Skodol, M.D.,  
Donna S. Bender, Ph.D., and John M. Oldham, M.D.

*Module III* provides a comprehensive assessment of each of the six specific personality disorders of the Alternative Model. It features clear guidance through the new diagnosis of Personality Disorder-Trait-Specified and elucidates when this diagnosis is applicable. The module concludes with a global assessment of the level of personality functioning and includes a survey of all the personality disorder diagnoses in the module.

2018 • 61 pages • ISBN 978-1-61537-185-3  
Paperback (package of 5) • \$80.00, £59.00  
Item #37185

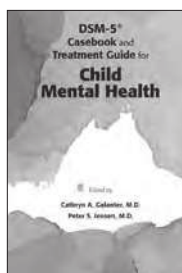

## Learning DSM-5<sup>®</sup> by Case Example

Michael B. First, M.D., Andrew E. Skodol, M.D., Janet B. W. Williams, Ph.D., and Robert L. Spitzer, M.D.

This book is the comprehensive guide to mental disorders for practitioners and students. The nearly 200 cases featured in this guide are drawn from the clinical experience of well over 100 clinicians. At least one case presentation is provided for each of the disorders catalogued in DSM-5, and nearly half of the disorders include multiple cases that give readers an appreciation for the heterogeneity typical of these disorders.

### DSM Select at PSYCHIATRYonline.org for Individuals

Psychiatryonline.org is a powerful website that features DSM-5® and The American Journal of Psychiatry as the cornerstones of an unsurpassed collection of psychiatric references, including books, journals, and self-assessment tools. Much more than simply books and journals presented online, Psychiatryonline.org features sophisticated searching and indexing tools that enable you to quickly target all the information you need.

DSM Select individual subscription is an integral component of everyday psychiatric practice. Resources are provided to assist you with

- Diagnosis
- Treatment
- The latest research and news in the field
- Professional development
- Certification, recertification, and CME support

DSM Select individual subscription at Psychiatryonline.org includes these must-have resources for psychiatrists

#### DSM Library:

- DSM-5®
- DSM-5® Handbook of Differential Diagnosis
- DSM-5® Clinical Cases

#### APA Practice Guidelines

- Quick Reference and Comprehensive versions

#### Textbooks:

- The American Psychiatric Publishing Textbook of Psychiatry, Sixth Edition
- Gabbard's Treatments of Psychiatric Disorders, Fifth Edition
- The American Psychiatric Publishing Textbook of Psychopharmacology, Fifth Edition
- Manual of Clinical Psychopharmacology, Eighth Edition

#### Journals:

- The American Journal of Psychiatry
- Psychiatric Services
- Journal of Neuropsychiatry and Clinical Neurosciences
- Psychiatric News

#### For Patients and Families:

- Helping Parents and Teachers Understand Medications for Behavioral and Emotional Problems: A Resource Book of Medication Information Handouts
- What Your Patients Need to Know About Psychiatric Medications
- Understanding Mental Disorders: A Patient and Family Resource

Whether making a diagnosis, developing a treatment plan, staying abreast of the latest research findings, or branching into new areas of practice, DSM Select individual subscription at Psychiatryonline.org has the vital information and tools you need to help you do your job.

### Additional products available on PSYCHIATRYonline.org

Start your professional library with the core DSM Select individual subscription package then add the following books to customizing your online digital library with the books and CME that meet your needs. These are available in separate subscriptions.

#### Textbooks

- The American Psychiatric Publishing Textbook of Substance Abuse Treatment, Fifth Edition
- The American Psychiatric Publishing Textbook of Geriatric Psychiatry, Fifth Edition
- Dulcan's Textbook of Child and Adolescent Psychiatry, Second Edition
- Textbook of Psychotherapeutic Treatments

#### DSM Select 12 Month Subscription

\$366.00 – American Psychiatric Association Member Price

\$146.00 – American Psychiatric Association Resident-Fellow Member Price

## The American Journal of Psychiatry

Editor: Ned H. Kalin, M.D.

Committed to keeping the field of psychiatry vibrant and relevant by publishing the latest advances in the diagnosis and treatment of mental illness, *The American Journal of Psychiatry* (AJP) is one of the most widely read psychiatric journals in the world and is the journal that the overwhelming majority of psychiatrists considers essential. Published monthly, it is an indispensable journal for all psychiatrists and other mental health professionals who need to stay on the cutting edge of virtually every aspect of psychiatry.

### Highlights:

- *The American Journal of Psychiatry's* latest Impact Factor is 13.391. (Thomson Reuters 2018)
- A recent poll conducted by the BioMedical & Life Sciences Division of The Special Libraries Association identified the 100 most influential journals in all of Biology & Medicine over the last 100 years. *The American Journal of Psychiatry* was among those honored, the only psychiatry/psychology journal represented.
- AJP is number three in psychiatry in terms of immediacy according to Thomson Scientific's Immediacy Index. This important performance metric is a good measure of how quickly a given journal's articles are cited—AJP's placement is a result of publishing articles that are relevant, covering current “hot” topics and cutting-edge research, and getting these findings to the field faster with AJP in Advance, the Journal's online-ahead-of-print publication protocol.

### Features:

- **AJP in Advance**—As part of the Journal's commitment to bringing the latest research to the field faster, all research articles now appear online in advance of their appearance in a print issue. *AJP in Advance* is updated with new articles on the 1st and 15th of each month (or the next business day).
- **Treatment in Psychiatry Series**—Leading experts provide a hypothetical case vignette on commonly encountered issues in patient care followed by a summary of the relevant research literature, plus offers recommendations of how to proceed with assessment and treatment.
- **Clinical Case Conference Series**—Complements the Treatment in Psychiatry series by giving additional practice oriented guidance by presenting actual patients (with disguised identities) who pose especially difficult or unique problems in diagnosis and treatment.
- **AJP Audio**—Each online issue includes a 30-minute downloadable MP3 format program that contains highlights and selected findings from the issue.
- **Residents Journal**—Each online issue is also accompanied by a FREE electronic publication produced specifically for psychiatry residents that features instructive cases, perspectives on training and career development, and discussions of unique clinical or educational programs along with special instructional columns from AJP Editors.

No other psychiatric journal reaches more psychiatrists with greater impact or immediacy than *The American Journal of Psychiatry*, the journal that the overwhelming majority of psychiatrists consider essential. The findings presented in AJP explore the full spectrum of issues related to mental health diagnoses and treatment, with editorials that place the most groundbreaking research into clinical context.

## American Journal of Psychiatry CME

You now have an opportunity to earn CME credits by reading an article in *The American Journal of Psychiatry* and completing a short course for up to 1 *AMA PRA Category 1 Credit™*. The course comprises reading the article and answering three multiple-choice questions with a single correct answer. Upon completion of the course, correct answers will be highlighted for the reader's reference, there is no minimum threshold score necessary for the credit. A link from the question to the correct answer in context will be highlighted in the associated article, thus extending the learning experience for people who want to read more. A certificate documenting participation in the course and credits claimed is generated upon completion of the course. Progress through courses, certificates, and credits claimed are tracked in My CME personal folder.

The AJP CME program grants you access to 108 courses over a 3-year period. From the moment you subscribe, you will be able to select from all of the courses of the previous calendar year plus those already produced in the current year. You'll then be able to access the remaining courses in the current year plus the following calendar year's courses as they become available.

The American Psychiatric Association is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. CME credit is issued only online.

## Focus

Editor: Mark Hyman Rapaport, M.D.

*Focus*, APA's quarterly clinical review journal, is designed for practicing psychiatrists to keep abreast of significant clinical knowledge and advances in the field through self-directed lifelong learning. *Focus* is the best resource for clinical synthesis, expert guidance, lifelong learning, and maintenance of certification. Four issues each year provide comprehensive reviews of major clinical areas of psychiatry. *Focus* also provides an organized learning and self-assessment program with 44 hours of CME each year.

An annual subscription to *Focus* addresses core areas in psychiatry, with each issue overseen by a Guest Editor clinical expert in that area. This thought leader works with fellow experts and advisors to deliver an issue that keeps you abreast of the field. Each issue includes:

- Articles on best practices, new developments and the current state of practice
- Features designed to improve your ability to evaluate, diagnose, and manage clinical problems; communicate with your patients; and handle ethical dilemmas
- Curation of the important publications that have shaped clinical thinking in the field

Each issue also includes a quiz that allows you to earn up to 5 *AMA PRA Category 1 Credits™*—for a total of up to 20 per year—and all this can be done quickly online, with your CME certificate available immediately. An annual subscription also includes unlimited online access to all past volumes at no extra charge (CME for previous years' issue quizzes

not available). Each issue emphasizes a clinical topic. Recent topics include:

- Anxiety Across the Lifespan
- Biomarkers in Psychiatry
- Complementary and Integrative Medicine
- Depression
- Psychotherapy
- Schizophrenia
- Treating the Invisible Wounds of War

Because the practice of psychiatry extends far beyond the core areas covered in *Focus* each volume year, we've introduced new features intended to capture additional and emerging areas of clinical interest:

- 21st-Century Psychiatrist—With advances in treatment and medical knowledge as well as changes in regulatory requirements, systems of care, and models of care, this feature provides brief updates that help the busy practitioner know where to go and what to do to stay current and compliant.
- The Applied Armamentarium—This feature presents evidence to fill the gap between results from regulatory trials and treatment management in the clinic.
- Safety Commentary—Patient safety is an area in which physicians are being held accountable. This column provides expert commentary in the area of safety standards, with a focus on those most relevant to psychiatry.
- Annual review of the Clinical Landscape—The Editors and Editorial Board summarize the most important clinical discoveries which directly impact clinical care of patients.

Your subscription also includes the annual *Focus* Self-Assessment Examination, written by practicing psychiatrists and clinical experts. Completing this 120-question exam allows you to earn an additional 24 *AMA PRA Category 1 Credits™* and 24 ABPN approved self-assessment credits.

#### Quarterly Subscription

##### U.S. Rates

#### APA Member Subscription

1 Year: \$426.00 | 2-Year: \$768.00 **Save 10%**

#### Individual Subscription

## Earn CME Credits— Up to 44 Per Year

Earn up to five hours of *AMA PRA Category 1 Credits™* by answering the CME questions in each issue. Complete the questions on the form in the printed journal and return it to APA or take the questions online at the journal's website.

In addition to CME credits, these questions help prepare the reader for the annual 120-question self-assessment exam on the current year's content, which is taken at the end of each year for an additional 24 CME credits. The self-assessment exam allows participants to compare their confidential certification score with national norms.

The American Board of Psychiatry and Neurology has reviewed *FOCUS: The Journal of Lifelong Learning in Psychiatry* and the *FOCUS* Self-Assessment Examination and has approved this program as part of a comprehensive lifelong learning and self-assessment program, which is mandated by the ABMS as a necessary component of maintenance of certification.

The *FOCUS* Self-Assessment Program is also accredited for up to 24 hours of continuing professional development per year under Section 3 of the Maintenance of Certification program of the Royal College of Physicians and Surgeons of Canada.

The American Psychiatric Association (APA) has received accreditation with commendation by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

The American Psychiatric Association designates this journal based CME activity for a maximum of 44 *AMA PRA Category 1 Credits™*. Physicians should only claim credit commensurate with the extent of their participation in the activity.

## Psychiatric Services

### A Journal of the American Psychiatric Association

Editor: Lisa B. Dixon, M.D., M.P.H.

*Psychiatric Services* focuses on issues related to the delivery of mental health services, especially for people with severe mental illness in community-based treatment programs. Each month, *Psychiatric Services* features 15 or more research reports with results that have practical applications in the diverse settings where today's practitioners work. Authors of research reports include psychiatrists, psychologists, pharmacists, drug and alcohol treatment counselors, social workers, nurses, economists, and professionals in related systems such as welfare and criminal justice systems. Monthly columns keep readers up to date on important developments in areas such as law and psychiatry and state mental health policy. Issues feature book reviews, news, and letters to the editor.

## Psychiatric News

*Psychiatric News* is the “one-stop” source of information for busy psychiatrists and mental health professionals. Each issue covers major news that can help inform your patient care decisions as well as keep you updated on related areas that affect your practice. Clinical and research coverage includes reports on the latest developments in diagnosis, psychopharmacology, psychotherapy, and other treatments.

It is an absolute must-read for those who need to stay abreast of events in psychiatry as they happen.

## The Official Journal of the American Neuropsychiatric Association

Editor: David B. Arciniegas, M.D.

Deputy Editor: C. Alan Anderson, M.D.

## The American Journal of Psychotherapy

Begun in 1947 by the Association for the Advancement of Psychotherapy, *The American Journal of Psychotherapy* provides a forum for advancing the theory, science, and clinical practice of psychotherapy, publishing articles that expand the understanding of psychotherapies, especially in the domains of efficacy, process, education, and practice. The journal publishes empirical papers on psychotherapy outcomes, process, measurement, and education. Maintaining a strong clinical focus, it welcomes case reports, review articles, and training tools that will guide and shape clinical practice.

*The American Journal of Psychotherapy* inclusively addresses topics across treatment modalities (individual, group, family, technology-enabled), age groups (children, adolescents, midlife, late life), genders (binary, gender non-conforming), races and ethnicities, and diagnoses. The journal serves the international community by curating a vibrant, pluralistic, dialogue about psychotherapy that ultimately will inform clinical care.

## Benefits of Online Access

- Global search and browse options and search results pages across all psychiatryonline.org resources enable the most comprehensive, powerful psychiatric database searches available.
- Search results pages suggest related journal articles, book chapters, practice guidelines, and PubMed articles, enabling users to expand their psychiatric and psychological knowledge quickly.
- Psychiatric-specific topic collections cross-cut all psychiatryonline.org resources for each topic.
- PSYCHIATRYonline.org includes a mobile interface for smartphones so users can access their subscriptions anytime, from anywhere!
- Publication Alerts – email alerts for new and future content
- Ahead of Print Availability – articles appear online in advance of the printed journals, giving you first-look access to important studies.

## PSYCHOPHARMACOLOGY

### The American Psychiatric Association Practice Guideline for the Pharmacological Treatment of Patients With Alcohol Use Disorder

American Psychiatric Association

See *Addiction Psychiatry* (page 28) for description.

2018 • 224 pages • ISBN 978-0-89042-682-1  
Paperback • \$68.00, £50.00 • Item #2682

2018 • 224 pages • ISBN 978-0-89042-683-8  
eBook • \$54.00, £40.00 • Item #2683

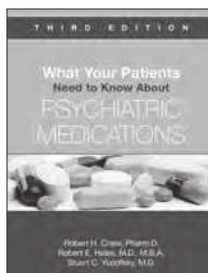

### Pocket Guide to Psychiatric Medications for Depression

American Psychiatric Association

Derived from an appendix to *The American Psychiatric Publishing Textbook of Psychopharmacology, Fifth Edition*, this book provides an indispensable guide to medications for the treatment of depression, including vital information on the approved indications, usual dosages, and maximum dosages for antidepressant medications.

2018 • 16 pages • ISBN 978-1-61537-195-2  
Spiralbound • \$9.95, £7.99 • Item #37195

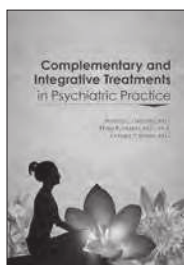

### What Your Patients Need to Know About Psychiatric Medications, Third Edition

Robert H. Chew, Pharm.D.,  
Robert E. Hales, M.D., M.B.A.,  
and Stuart C. Yudofsky, M.D.

Designed and organized to answer the most common questions about psychiatric medications, more than 70 medications from all of the major classes are discussed. This is a comprehensive resource for practitioners to educate their patients, and a source of practical information for patients themselves.

2017 • 485 pages • ISBN 978-1-58562-508-6  
Paperback • \$97.00, £72.00 • Item #62508

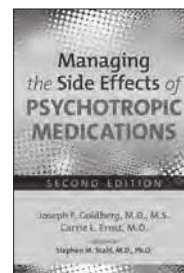

### Complementary and Integrative Treatments in Psychiatric Practice

Edited by Patricia L. Gerbarg, M.D.,  
Philip R. Muskin, M.D., M.A.,  
and Richard P. Brown, M.D.

This is a clinician's guide to nutrients, plant-based medicines, mind-body practices, neurotherapy, neurostimulation, equine therapy, attention training, visual management, and other approaches in the treatment of five major DSM-5 categories. The book provides guidance on how to integrate CAIM therapies with conventional treatments.

## NEUROPSYCHIATRY AND BIOLOGICAL PSYCHIATRY

NEW!

## The American Psychiatric Association Publishing Textbook of Neuropsychiatry and Clinical Neurosciences, Sixth Edition

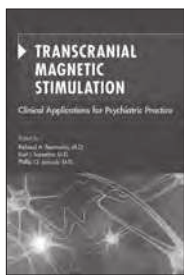

Edited by David B. Arciniegas, M.D.,  
Stuart C. Yudofsky, M.D., and  
Robert E. Hales, M.D., M.B.A.

In this thoroughly revised and restructured sixth edition, the editors offer a modern reconsideration of the core concepts, conditions, and approaches in neuropsychiatry, providing clinicians with the knowledge and tools they need to practice in this demanding field. From the initial overview of the principles of structural and functional neuroanatomy and neuropsychiatric assessment, to the neuropsychiatry of neurodevelopmental disorders, acquired neurological conditions, neurodegenerative disorders, and primary psychiatric disorders, this book is meticulously edited, painstakingly researched, and compellingly written.

## Transcranial Magnetic Stimulation

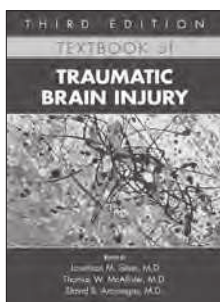

### Clinical Applications for Psychiatric Practice

Edited by Richard A. Bermudes, M.D.,  
Karl I. Lanocha, M.D., and  
Philip G. Janicak, M.D.

This book offers the most up-to-date information for referring and comanaging patients who are candidates for transcranial magnetic stimulation (TMS). This information is difficult to find because the majority of psychiatric residency programs do not offer any curriculum on TMS therapy and continuing education conferences are limited. This is a practical reference for the management of depressed patients who are candidates for TMS.

## Outside the Box: Rethinking ADD/ADHD in Children and Adults

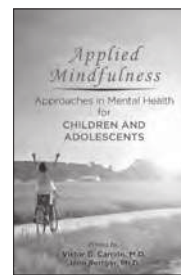

*A Practical Guide*

Thomas E. Brown, Ph.D.

The book offers science-based answers—in plain, understandable language—to a wide variety of questions about ADHD that are often raised not only by adolescents and adults in the general public, but also by professionals in pediatrics, general medicine, psychiatry, psychology, nursing, education and other related fields. The book is structured with each chapter posing an important question about ADD/ADHD, and then providing answers, discussion, and pertinent research and references.

## Study Guide to Child and Adolescent Psychiatry

A Companion to Dulcan's Textbook of Child and Adolescent Psychiatry, Second Edition

Philip R. Muskin, M.D., and  
Anna L. Dickerman, M.D.

This is a question-and-answer companion that allows you to evaluate your mastery of the subject matter as you progress through *Dulcan's Textbook of Child and Adolescent Psychiatry*, Second Edition. The *Study Guide* is made up of approximately 290 questions divided into 49 individual quizzes of 5-8 questions each that correspond to chapters in the textbook. Questions are followed by an answer guide that references relevant text and a discussion that not only addresses the correct response but also explains why other responses are not correct.

## Autism Spectrum Disorders

Edited by Eric Hollander, M.D., Randi Hagerman, M.D., and Deborah Fein, Ph.D.

This serves as an essential guide and concise, focused introduction to the progress and promise of autism research and evidence-based and targeted treatments. The editors have assembled a formidable roster of experts on autism spectrum disorders, as well as on genetics, epidemiology, environmental toxicity, occupational therapy, and other fields that contribute to our understanding of the etiology and treatment of these complex disorders, to create a book that is cutting edge, yet accessible enough to be suitable for families as well as for clinicians.

## Play Therapy

*A Psychodynamic Primer for the Treatment of Young Children*

Pamela Meersand, Ph.D., and Karen J. Gilmore, M.D.

This book provides a contemporary, comprehensive exploration of the theory and technique of psychoanalytically oriented play therapy, reflecting recent shifts in psychoanalytic theory and incorporating relevant information from neighboring fields. The first half of the volume tackles major theoretical issues, while the second half offers pragmatic guidance on conducting play treatment and handling the complexities of treating young children.

### Culture, Heritage, and Diversity in Older Adult Mental Health Care

Edited by Maria Llorente, M.D., FAPA  
APA Council on Aging

This book is designed to inform these individuals and groups about the specific needs of different patient populations, educate them about evidence-based models of culturally competent health care services delivery, and train them in the skills needed to function in an increasingly diverse arena. From appreciating the unique role of communication in obtaining a patient history to establishing a treatment plan for older adults with diverse life experiences, this book supplies clinicians with the knowledge and skills they need to relate competently and compassionately to patients from a wide range of backgrounds.

## ADDICTION PSYCHIATRY

### The American Psychiatric Association Practice Guideline for the Pharmacological Treatment of Patients With Alcohol Use Disorder

American Psychiatric Association

The guideline focuses specifically on evidence-based pharmacologic treatments for alcohol use disorder (AUD), but also includes statements related to assessment and treatment planning that are an integral part of using pharmacotherapy to treat AUD. The guideline offers clear, concise, and actionable recommendation statements to help clinicians incorporate them into clinical practice.

### Co-occurring Mental Illness and Substance Use Disorders

*A Guide to Diagnosis and Treatment*

Edited by Jonathan D. Avery, M.D., and John W. Barnhill, M.D.

This book presents an evidence-based approach to patients with at least two psychiatric disorders, one of which relates to substance use. The range of psychiatric disorders and the number of substances of abuse create complexity that can feel overwhelming to clinicians, and the book addresses this challenge by providing straightforward strategies for diagnosing and treating people with complicated presentations. The chapters are case-based and written in an accessible style that highlights commonalities.

### The American Psychiatric Publishing Textbook of Substance Abuse Treatment, Fifth Edition

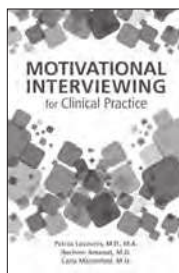

Edited by Marc Galanter, M.D., Herbert D. Kleber, M.D., and Kathleen T. Brady, M.D., Ph.D.

This thoroughly revised fifth edition retains the basic structure of the last while incorporating new material on a wide variety of topics and integrating the new DSM-5 classification throughout. The contributors present the most current scientific and clinical information on a wide range of substance use disorders, from legal substances, to prescription drugs, to the epidemic of illicit drugs, to substances that may become a more critical problem as access is liberalized.

## Office-Based Buprenorphine Treatment of Opioid Use Disorder, Second Edition

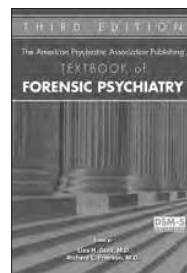

Edited by John A. Renner, Jr., M.D.,  
Petros Levounis, M.D., M.A., and  
Anna T. LaRose, M.D.

This second edition offers accessible and applicable guidance about prescribing buprenorphine. Bulleted clinical pearls at the end of each chapter, as well as specific clinical recommendations and detailed case discussions, make it easier for readers to retain knowledge and integrate it into their practice. TAs an added bonus, this edition can also be used to complete the 8 hours of qualifying training required for the buprenorphine waiver.

## FORENSIC PSYCHIATRY, LAW, AND ETHICS

## The American Psychiatric Association Publishing Textbook of Forensic Psychiatry, Third Edition

Edited by Liza H. Gold, M.D., and  
Richard L. Frierson, M.D.

The new, third edition has undergone a major expansion and a comprehensive revision. The book has been restructured to reflect the ABPN Content Outline for the Certification Examination in Forensic Psychiatry. In addition, the book constitutes a useful reference for general psychiatrists and psychologists interested in the legal issues that may impact clinical practice. The emphasis on Landmark Cases—critically important topics in case law—is highlighted in this edition, fostering understanding of the evolution of legal principles on the general practice of psychiatry and in the subspecialty of forensic psychiatry.

### Physician Suicide Cases and Commentaries

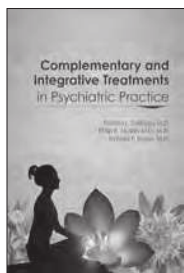

Peter Yellowlees, MBBS, M.D.

The book explores the culture of medical training and practice and how this interacts with the stressors and illnesses that impact physicians over the course of their professional lives. The book examines how the related disorders of burnout, anxiety, depression, and addiction, can lead to suicide and explores the influence of gender, culture, aging, and personal resilience on outcomes. In addition, it investigates ways to mitigate the impact of these factors to improve physician health and well-being and thereby reduce the number of physicians who kill themselves. The case studies are detailed and compelling, allowing the reader entry to the lives and thought processes of the fictional subjects.

## Psychodynamic Approaches to Behavioral Change

Fredric N. Busch, M.D.

Readers will find in this guide a practical framework not only for identifying and understanding problematic behaviors and conceiving alternative behaviors, but also for anticipating potential pitfalls in efforts to change behaviors and choosing interventions for helping patients sustain new behavior. Throughout, vignettes illustrate how to apply these psychodynamic techniques in the clinical setting as clinician and patient collaborate to make practical changes in the patient's life.

## The Art and Science of Brief Psychotherapies

A Practitioner's Guide, Third Edition

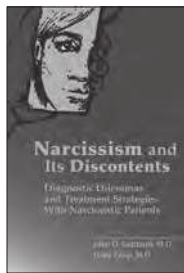

Core Competencies in Psychotherapy

Edited by Mantosh J. Dewan, M.D.,  
Brett N. Steenbarger, Ph.D.,  
and Roger P. Greenberg, Ph.D.

This third edition is a comprehensive and practical guide to the major short-term therapies. Each chapter is thoroughly updated, and new chapters cover such topics as dialectical behavior therapy, multicultural practice, and mentalizing, as well as fresh approaches to intervention, such as telepsychiatry and Internet-based interventions.

## Long-Term Psychodynamic Psychotherapy

A Basic Text, Third Edition  
Core Competencies in  
Psychotherapy

Glen O. Gabbard, M.D.  
Series Editor: Glen O. Gabbard, M.D.

This new edition continues the tradition of exposing beginners to the basic features of the psychodynamic approach while also challenging them to think in a sophisticated way about the complexities of their patients. Each chapter has been revised to reflect advances in the field and the new data relevant to the practice of dynamic therapy. Therapeutic topics are brought to life through accompanying videos, which have been expanded for this edition, providing students and residents a visual reference to the text through case study vignettes of a senior clinician at work.

### Motivational Interviewing for Clinical Practice

Edited by Petros Levounis, M.D., M.A.,  
Bachaar Arnaout, M.D.,  
and Carla Marienfeld, M.D.

The book provides busy clinicians with expert guidance for integrating motivational interviewing into their practice. Motivational interviewing, which helps patients change their health behaviors, requires practice and focused attention on skill development. The study questions at the end of most chapters, accompanied by an answer guide, will help reinforce basic concepts.

## High-Yield Cognitive-Behavior Therapy for Brief Sessions

An Illustrated Guide

Jesse H. Wright, M.D., Ph.D.,  
Donna M. Sudak, M.D.,  
Douglas Turkington, M.D.,  
and Michael E. Thase, M.D.

The book details ways to enrich brief sessions with practical CBT interventions that work to relieve symptoms and promote wellness. An engaging and instructive resource of video illustrations included with the book demonstrates how to successfully implement brief CBT sessions for some of the most common and important problems seen in clinical practice.

2010 • 383 pages • ISBN 978-1-58562-362-4  
Paperback • \$84.00, £62.00 • Item #62362

## Learning Cognitive-Behavior Therapy

An Illustrated Guide, Second Edition

Core Competencies in Psychotherapy

Jesse H. Wright, M.D., Ph.D.,  
Gregory K. Brown, Ph.D.,  
Michael E. Thase, M.D.,  
and Monica Ramirez Basco, Ph.D.  
Series Editor: Glen O. Gabbard, M.D.

This second edition seamlessly combines 23 all-new videos with informative text and figures, charts, worksheets, checklists, and tables to help readers not only learn the essential skills of CBT but achieve competence in this important evidence-based treatment method. This guide provides readers with instruction, tools, and expert demonstrations on building an effective therapeutic relationship with CBT, conceptualizing a case with the CBT model, structuring sessions, and resolving common problems encountered in CBT.

## Cognitive-Behavior Therapy for Severe Mental Illness

An Illustrated Guide

Jesse H. Wright, M.D., Ph.D.,  
Douglas Turkington, M.D.,  
David G. Kingdon, M.D., and  
Monica Ramirez Basco, Ph.D.

This practical and insightful guide distills CBT techniques for individual therapy and video demonstrations on DVD that illustrate how these techniques can be used to tackle a wide range of severe clinical problems.

2009 • 374 pages • ISBN 978-1-58562-321-1  
Paperback • \$79.00, £59.00 • Item #62321

## Becoming Mindful

Integrating Mindfulness Into Your Psychiatric Practice

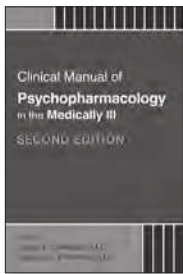

Erin Zerbo, M.D., Alan Schlechter, M.D.,  
Seema Desai, M.D., and  
Petros Levounis, M.D., M.A.

Featuring embedded exercises and guided meditations—as well as an appendix with audio guided meditations and a resource list—this book provides clinicians with readily accessible tools to use in sessions with patients. Key takeaways summarize each chapter's content.

2017 • 209 pages • ISBN 978-1-61537-075-7

## Study Guide for the Psychiatry Board Examination

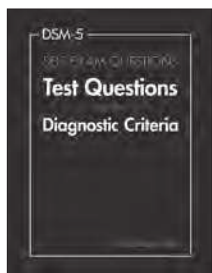

Edited by Philip R. Muskin, M.D., and Anna L. Dickerman, M.D.

The selection of topics follows the American Board of Psychiatry and Neurology Certification Examination in Psychiatry 2015 Content Blueprint, thoroughly preparing and familiarizing readers with both the subject matter and test experience. Content for the approximately 400 questions contained in the study guide was culled from numerous, readily available American Psychiatric Publishing texts, and each multiple choice question is followed by explanations for both the correct and incorrect options, with the appropriate citations for further study.

### Psychodynamic Therapy for Personality Pathology Treating Self and Interpersonal Functioning

Eve Caligor, M.D., Otto F. Kernberg, M.D., John F. Clarkin, Ph.D., and Frank E. Yeomans, M.D., Ph.D.

The book introduces Transference-Focused Psychotherapy—Extended (TFP-E), a specialized, theory-driven approach to the treatment of personality disorders. This guide is both compatible with the DSM-5 Section III Alternative Model for Personality Disorders and elaborates on it, offering clinicians at all levels of experience an accessible framework to guide evaluation and treatment of personality disorders in a broad variety of clinical and research settings.

### Narcissism and Its Discontents

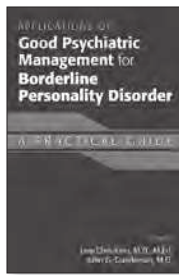

Diagnostic Dilemmas and Treatment Strategies With Narcissistic Patients

Glen O. Gabbard, M.D., and Holly Crisp, M.D.

Integrating contemporary research with psychoanalytic theory, this book offers clinicians strategies for dealing with the complex situations that can arise when treating patients with narcissistic personality disorder (NPD). This guide recognizes the challenges and provides a number of psychoanalytic and psychotherapeutic approaches—including transference and countertransference—to adjust treatment to the patient rather than constraining clinician and patient by strictly adhering to a manualized treatment.

### Treatment of Severe Personality Disorders

Resolution of Aggression and Recovery of Eroticism

Otto F. Kernberg, M.D.

The book explores the concepts of personality in the context of its neurobiological and intrapsychic determinants, proposes a new classification and new methods of psychotherapeutic interventions, expands the analysis of severe narcissistic pathology, and details the many complications in the sexual life of patients with personality disorders. Clinicians working with patients afflicted with severe personality disorders will find the author's laser focus on the nature of narcissistic pathology and its treatment instructive and the clinical examples illuminating.

**GENDER-RELATED ISSUES**

**NEW!**

**Transgender Mental Health**

Eric Yarbrough, M.D.

This guide is designed to educate clinicians on how to address the basic needs of the TGNC community, and thus increase access to mental health care for TGNC individuals. Four sections address topics such as the history of the TGNC experience, mental health factors particular to the TGNC community, physical health—including hormones—of TGNC individuals, and gender-affirming surgical procedures, as well as nonsurgical interventions. Summarizing key points and review questions are included at the end of each chapter.

**Improving Mental Health  
Four Secrets in Plain Sight**

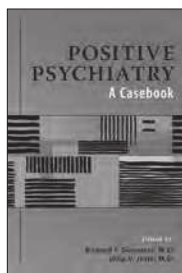

Lloyd I. Sederer, M.D.

Foreword by Patrick Kennedy

Dr. Lloyd Sederer explores four foundational truths he has identified over his extensive career. These "secrets," as he calls them, are hidden in plain sight. Written for clinicians in both mental health and primary care, as well as lay readers, this eloquent and concise book is full of patient stories designed to illuminate four secrets for a happier life.

## Positive Psychiatry

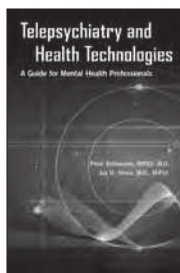

### A Casebook

Edited by Richard F. Summers, M.D.,  
and Dilip V. Jeste, M.D.

The guide opens with an overview of the history of the positive in psychiatry, a summary of the effectiveness of positive interventions, and an over-arching conceptualization of the field of positive psychiatry. Thirteen detailed cases follow, organized into three sections: mental health, medical care, and educational and coaching interventions. The cases provide readers with the opportunity to engage deeply in the clinical descriptions, decision-making, and assessment of outcomes.

## Telepsychiatry and Health Technologies

### A Guide for Mental Health Professionals

Peter Yellowlees, MBBS, M.D., and  
James H. Shore, M.D., M.P.H.

This is a practical guide for psychiatrists and other mental health professionals seeking to exploit the enormous potential of today's innovative digital technologies to improve the quality, accessibility, and cost-effectiveness of care for patients with psychiatric disorders. Taking the doctor-patient relationship as its consistent focus, the book explores currently available mental health care delivery technologies—from telephony, smartphones, and apps to e-mail, secure texting, and videoconferencing—and offers practical advice to clinicians on how best to make use of these tools to provide high-quality care to their patients.

The screenshot shows the website interface for psychiatryonline.org. The main content area features a large purple banner for the DSM-5, with the text: "The latest edition of the most comprehensive resource used by health professionals, social workers, and forensic and legal specialists to diagnose and classify mental disorders." Below this, there are links to explore the latest edition, view online assessment measures, and use DSM-5 in the transition to ICD-10. A right-hand sidebar contains "Psychiatric News" with links to Home, Current Issue, Archive, and Subscribe. Below the sidebar, there are four columns of journal links: The American Journal of Psychiatry, Psychiatric Services, The Journal of Neuropsychiatry and Clinical Neurosciences, and Gun Violence & Mental Health. Each column includes a thumbnail of the journal cover and a list of links (Home, Current Issue, AJP in Advance, All Issues, Podcast, Residents' Journal, Submit Article, Subscribe). Below the journal links, there are several article teasers with titles and publication dates. For example, "Allele-Specific Methylation of SPDEF: A Novel Moderator of Psychosocial Stress and Substance Abuse" published online on 11 Dec 2018. Other teasers include "Decision Making About Pathways Through Care for Racially and Ethnically Diverse Young Adults...", "Functional and Structural Connectivity of the Cerebellar Nuclei With the Striatum and Cerebral Cortex in...", "Care Pathways Before First Diagnosis of a Psychotic Disorder in Adolescents and Young Adults", "An Innovative Approach to Care: Integrating Mental Health Services Through Telemedicine in Rural...", "Anti-N-Methyl-D-Aspartate Receptor Encephalitis: A Review of Psychiatric Phenotypes and Management...", "Development and Validation of a Dementia Risk Prediction Model in the General Population: An Analysis of...", "Benzodiazepine Use and Misuse Among Adults in the United States", and "Delusional Misidentification Syndrome: Phantom Boarder Syndrome Presenting With Intact General...".
