

Education

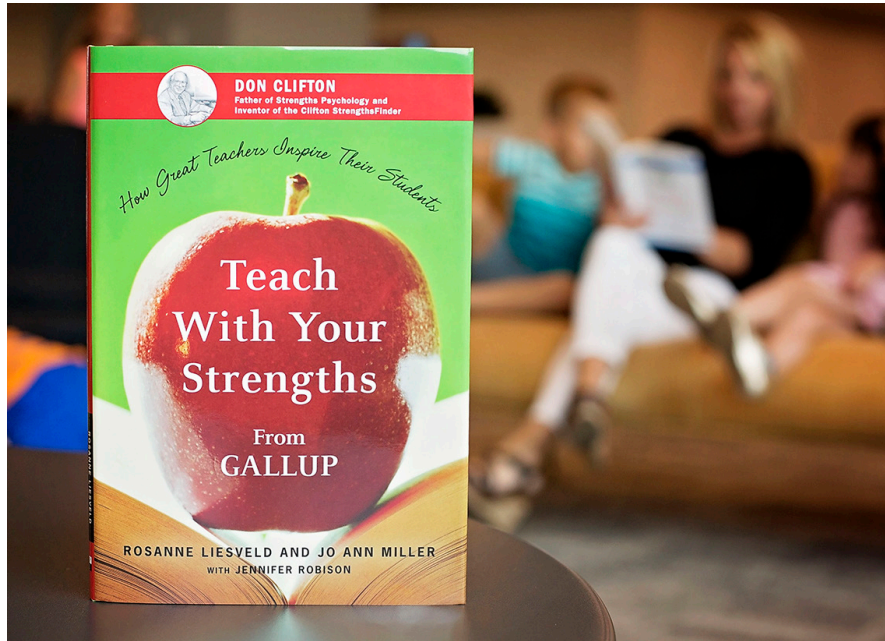

Gallup is leading research into the future of education and creating specialized solutions and tools so schools can help students have great jobs and great lives.

Gallup's education products help students, teachers and schools thrive.

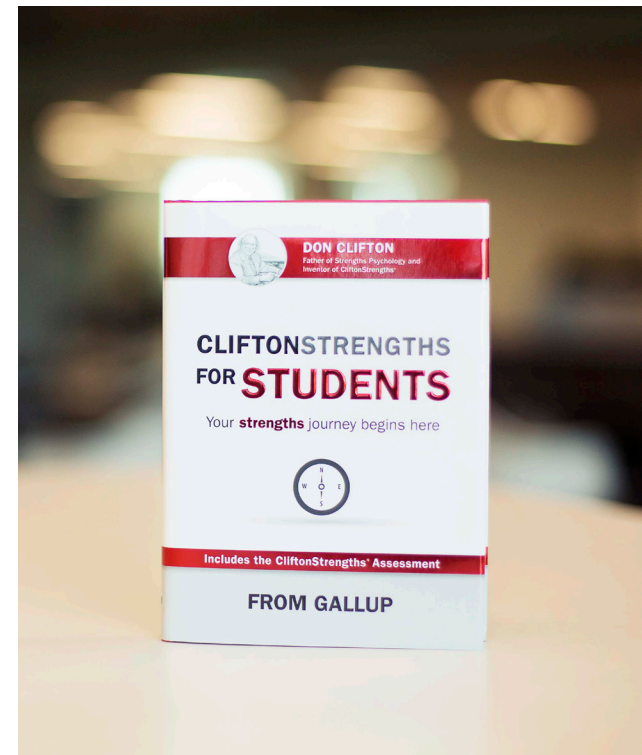

Use Gallup's powerful research, curricula and classroom activities to inspire hope and self-confidence in students of all ages and improve their chances for academic success. The best schools help students discover their talents and develop them into strengths. When students apply their strengths at any stage in their development — grade school, high school or college — they are more hopeful for the future, engaged and thriving at school, and have a better chance at leading a successful life.

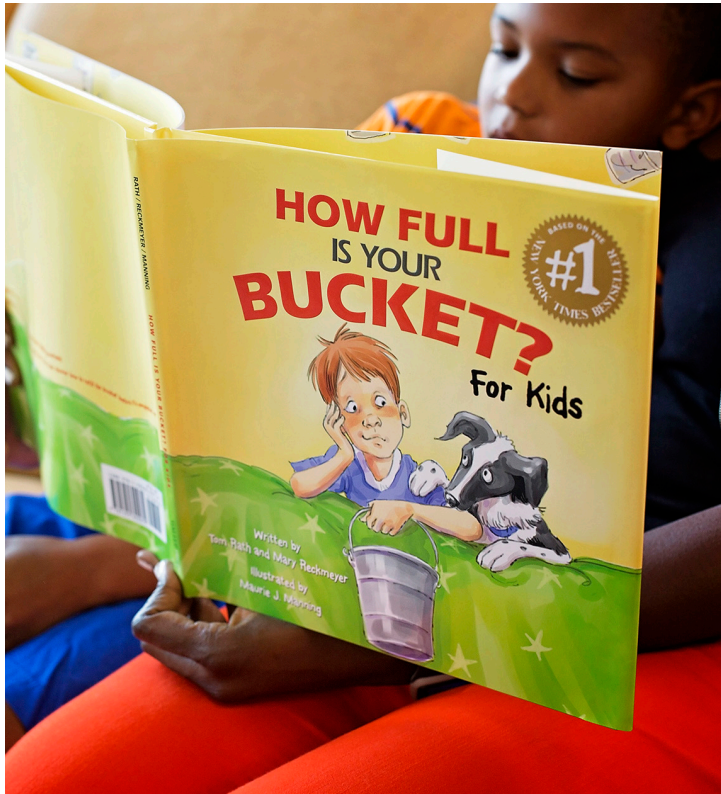

The best schools also have the best teachers. Like successful students, the best teachers focus on their strengths. Learn what these great teachers do differently, and use Gallup's products for teacher and staff development. Get the tools and practical advice you need to transform your school's culture and maximize your outcomes and goals by focusing on what's strong, not on what's wrong.
