CHRONIC PAIN IN DOGS

This book aims to introduce veterinary surgeons to a new concept of pain for a better understanding of what pain is and how it occurs. By describing pain pathways and their regulation, as well as the sophisticated therapeutic systems that are currently being developed, this book shows its readers how to interpret pain, and how identify it as a pathology in itself and treat it as such.

BEHAVIOURAL CHANGES ASSOCIATED WITH PAIN in companion animals

This book deals with pain in companion animals and how it affects their welfare, health and, of course, behaviour. It describes the difficulties encountered to finally reach the conclusion that animals and humans share the same neurophysiological mechanisms to feel pain. It then goes deeper into the changes that pain can cause in the behaviour of dogs and cats and the tools available to the veterinary surgeon to control it.

ATLAS OF TUMOURS ONCOLOGY IN DAILY CLINICAL PRACTICE

This book describes a practical, simple work protocol which may be useful to most of those first-opinion veterinary practitioners who have to deal with cases of neoplasia in their practices. It combines the experience in clinical oncology of a first-opinion veterinary surgeon and the knowledge of a veterinary practitioner specialised in this field.

CANINE AND FELINE ONCOLOGY FROM THEORY TO PRACTICE

This book describes the essential aspects and the latest advances in oncology in a very instructive manner. It also includes a chapter about the most common tumours in daily practice, their protocols and recommended treatments, as well as real clinical cases and the most common chemotherapy protocols in cats and dogs.

QUICK GUIDEBOOK TO CANINE AND FELINE OPHTHALMOLOGY

The aim of this guide is to provide both the vet and the student with a quick reference guide to enable them to easily recognise the most common ophthalmological ailments seen in daily practice. The more than 700 images shown in this guide belong to real cases.

eBook included 

FELINE OPHTHALMOLOGY. THE MANUAL

The aim of this book is to provide the clinician with a visual guide to accurately diagnose and treat the most common ophthalmological eye disorders in cats. It has been designed for veterinary surgeons in practice, final year veterinary students and those with a particular interest in feline species, especially in ophthalmology.

ATLAS OF PARASITOLOGICAL DIAGNOSIS IN DOGS AND CATS. VOLUME I: ENDOPARASITES

The standout feature of this up-to-date, descriptive atlas dedicated to the main endoparasites of dogs and cats is its diagnosis-oriented format. Each chapter is divided into four closely related sections, which facilitates interpretation of the content and turns this atlas into a reference in the field of small animal parasites.

PORCINE ENZOOTIC PNEUMONIA

Porcine enzootic pneumonia is a chronic respiratory disease responsible for high morbidity rates and great economic losses. This book attempts to update, condense and simplify the large amount of available information about it, including a high number of graphic contents to provide the veterinary surgeon with a handy tool to fully understand, treat, control and prevent this disease.

PORCINE CIRCOVIRUS TYPE 2: THE VIRUS, THE DISEASE AND THE VACCINE

This book, focused on the most remarkable facts linked to porcine circovirus type 2 (PCV2) and related diseases, places special emphasis on aspects connected with immunity, diagnosis and proper use of vaccines, which have brought about a revolution in the subclinical control of PCV2 since mid/late 2000s due to their great efficacy.

BIOSECURITY AND PATHOGEN CONTROL for pig farms

There are very few books on biosecurity and this one details the subject explaining why but more seriously providing practical advice on how to complete a review of the biosecurity measures required on a modern pig farm. The aim of this book is to be an easy reference guide for those involved in maintaining the health status of pig farms including abundant guidelines, advice sheets, flowcharts and pictures.

PRRSv GUIDE PORCINE REPRODUCTIVE AND RESPIRATORY SYNDROME VIRUS

The objective of this guide is to provide a practical summary regarding current knowledge and understanding of porcine reproductive and respiratory syndrome (PRRS). The information presented is focused on clinically relevant and practical information to help field veterinary surgeons and farm team personnel interested in animal health.

SWINE DISORDERS GUIDE

This guide is a collection of key data and practical recommendations that turns it into a reference handbook for pig farmers, technicians and workers on swine operations. A number of tables and diagrams summarise the standard parameters relating to production, pig flows and the main clinical signs of swine diseases. The control lists included may be used as a starting point for the identification of disease outbreaks in breeding farms.

SWINE RESPIRATORY DISEASE

This book aims to provide an updated overview on the most common pathogens responsible for porcine respiratory disease complex. The authors, all renowned and award-winning experts with a wide experience in respiratory diseases in pigs, have focused their efforts on gathering the latest information and data available on the topics covered while making the book as readable as possible.

THE BASIC STOCKMANSHIP GUIDE: PIGS, HOGS AND SWINE

This guide is presented as a series of advice sheets that provide rapid information in a format easily understood by every member of the farm team. It includes sheets to aid the stockmanship as well as the checking and auditing of biosecurity standards that are considered as the foundation stone of health on a pig farm.

LACTOGENIC IMMUNITY IN THE SOW: A PRACTICAL APPROACH

Good transfer of passive immunity from sows to piglets is crucial to ensure piglet survival on pig farms. This book is intended to help veterinary practitioners work towards this goal, and includes a review of the basics of immunology and vaccination, as well as comprehensive chapters on the immunisation programmes used in sows and on the transfer of passive immunity from sows to piglets.

MANAGEMENT OF THE HYPERPROLIFIC SOW

Technical work mainly focused on the management of pig farms working with hyperprolific genetics, which almost completely monopolise the market in this species in both productive and reproductive terms. The author, a renowned experienced specialist in swine genetics, provides key information to facilitate the management of these lines by veterinary professionals.

ATLAS OF ANATOMICAL PATHOLOGY OF THE GASTROINTESTINAL SYSTEM OF SWINE

Visual guide to the recognition and interpretation of lesions of the gastrointestinal tract of pigs. Integrates macro and microscopic findings associated with lesions that develop during the course of various pathological processes. Brief descriptions of the anatomopathological features of each image are provided, which is essential for proper understanding of the disease.

ANTIMICROBIAL THERAPY IN SWINE A PRACTICAL APPROACH

The author of this book has tried to present, in a visual and practical manner, the most important aspects a veterinary clinician should take into account to design appropriate antimicrobial treatments in swine herds. Thus, the most updated pharmacological knowledge is reviewed with the help of real clinical cases. It also includes a comprehensive review of what a prudent use of these essential tools to ensure our animals' health means.

HANDBOOK OF LABORATORY DIAGNOSIS IN SWINE

This useful handbook describes in detail the entire process of diagnosis, collection and sending of samples to the laboratory, the interpretation of findings, and the description of the basic laboratory techniques. It goes deeper into the knowledge of the different swine pathologies and clearly exposes the different pathologies using flow charts that will guide veterinary surgeons through the diagnostic process.

ATLAS OF ANATOMICAL PATHOLOGY OF THE PORCINE RESPIRATORY SYSTEM

This atlas facilitates the recognition of different types of lesions of the swine respiratory system. Its purpose is to show the morphological bases of swine respiratory pathological conditions and their causes. To this end, every image is accompanied by a brief text to better understand the microscopic and macroscopic changes observed and help vets to reach a diagnosis.

A GUIDE FOR SWINE NECROPSY

This guide is intended to aid swine veterinarians as they discuss the value of performing necropsies with their clients. Swine veterinary surgeons can use this guide with clients to increase their understanding of proper necropsy techniques and resulting methods of diagnosis.

A GUIDE TO NECROPSY DIAGNOSIS IN SWINE PATHOLOGY

This book describes how to carry out a quick and complete post-mortem examination with a technique that allows you to obtain the maximum possible information and helps in the observation of lesions for their correct interpretation. This necropsy protocol respects the different traditional incision and observation planes, as well as the sampling methods for further studies.

DRYING-OFF MANAGEMENT ESSENTIAL GUIDES ON CATTLE FARMING

This guide describes the main events that take place during the dry period, both in the udder and in the cow, and shows how they can influence the subsequent lactation period. The book also provides basic guidelines for a proper drying-off technique and management of cows during this period in order to reduce the prevalence of intramammary infections and achieve optimal milk production.

BOVINE MASTITIS

ESSENTIAL GUIDES ON CATTLE FARMING

Mastitis represents a major endemic disease of dairy cattle, being a very complex disease that depends on several factors and usually presented subclinically in herds. The treatment and control entails high costs and losses for the industry. The author has developed an accurate, visual review analysing the most highlighted features of this condition and pointing out the main control measures to prevent it.

ESSENTIAL GUIDE TO CALVING

How is the due date estimated? When is professional assistance required? These are some of the questions that may arise during calving. This book answers all of them in a simple and easy way. In this practical book, you will find the essential features that need to be taken into consideration during gestation, calving and the postpartum period in order to deal with calving successfully.

Q FEVER. AN EMERGING DISEASE

The aim of this book is to provide the practitioner with the most recent and best evidence information about Q fever in ruminants. After a brief introduction, the epidemiology and the pathogenesis are described to strengthen the key points regarding the improvement of control strategies. The clinical course of the disease and its impact on reproduction disorders are also depicted.

REPRODUCTION AND ULTRASOUND EXAMINATION IN CATTLE

A NEW PERSPECTIVE ON THE OESTROUS CYCLE

Second edition of "The oestrous cycle of the cow. A photographic atlas" which includes a detailed comparison of the uterine and ovarian structures in all the phases, along with ultrasound scans. The author makes the interpretation of these diagnostic tests easier thanks to real images observed on ultrasound examination.

THE PERIPARTUM COW. PRACTICAL NOTES

The cow's peripartum period from a practical and dynamic point of view, explained through theoretical explanations and a huge collection of clinical cases. Normally, disorders or conditions occurring in the peripartum period are not independent events; they are the result of the interaction of several events occurring over time. The authors highlight here the importance of assessing bovine pathologies as a whole. It is the only manner for the clinician to anticipate conditions that may appear during the peripartum period.

Elias Papadopoulos
 2016 / 128 pages / 22 × 28 cm

VACCINATION IN POULTRY

Vaccination is one of the cornerstones of poultry production and one that most influence production parameters in poultry industry. In broilers, the optimum time of vaccination should aim at obtaining the maximum meat yield. In layers and breeders, both time and the route of administration have an influence in the quality of egg shells and the number of eggs per laying, among others.

ATLAS OF AVIAN NECROPSY

This atlas, with more than 200 images, details a systematic, simple approach to the post-mortem examination of farmed poultry. Its contents include how to examine each organ and body system, what these organs look like when healthy, and most commonly encountered avian diseases at the slaughterhouse. The last chapter outlines a methodical approach for sampling during the post-mortem examination for subsequent diagnostic analysis.

SALMONELLOSIS

MAIN CHALLENGES IN POULTRY FARMING

Any veterinary surgeon involved in the poultry industry should be acquainted with avian salmonellosis and know how to control and prevent it. This handbook, entirely dedicated to avian salmonellosis with a handy and visual approach, will help experts understand, diagnose, treat and control this disease.

AVIAN INFECTIOUS LARYNGOTRACHEITIS

MAIN CHALLENGES IN POULTRY FARMING

Infectious laryngotracheitis is a highly infectious respiratory disease which causes significant mortality and loss of productivity in the poultry industry worldwide. This handbook goes straight to the point with a thorough, updated overview and high-quality images and illustrations.

HATCHERY VACCINATION

MAIN CHALLENGES IN POULTRY FARMING

The number of new technology vaccines available has increased worldwide since the mid 2000s. Their use within the poultry industry is more and more common, particularly in the last 5 years, and especially at hatchery level. This updated review highlights the key points of hatchery vaccination.

COCCIDIOSIS

MAIN CHALLENGES IN POULTRY FARMING

Practical handbook entirely dedicated to avian coccidiosis with a practical and visual approach. An up-to-date review has been carried out including the most important points to be tackled, such as aetiology, epidemiology, clinical signs, diagnosis and control.

AVIAN INFLUENZA

MAIN CHALLENGES IN POULTRY FARMING

The most updated information on avian influenza with a practical approach. The authors review the aetiology, clinical signs, diagnosis, and control of avian influenza viruses. It also includes numerous graphic resources to make the contents more understandable to readers.

VACCINATION FAILURES

MAIN CHALLENGES IN POULTRY FARMING

A vaccination failure occurs when animals do not develop suitable antibody titer levels and/or are susceptible to a disease outbreak. With this publication, an updated review has been thoroughly developed in order to highlight the importance of detecting and solving the major vaccination failures in commercial chickens.

RRP: €30 / w/o VAT: €28.85

Rights available.
Already in Spanish,
English, Turkish
and Polish.

INFECTIOUS BRONCHITIS

MAIN CHALLENGES IN POULTRY FARMING

Knowing the most hazardous features of avian infectious bronchitis is required to minimise its impact on poultry farming. This book is a comprehensive review of the disease, and includes images, tables, graphs, etc., accompanied by short texts to make the contents more accessible and help veterinary surgeons to tackle the disease effectively.

Emmanuel Baraza

2014 / 76 pages / 17 × 11 cm
Softcover, wire-o / EN / ES

ISBN: 978-84-942976-9-4
Ref.: LIBR0527 / P49550

RRP: €30 / w/o VAT: €28.85

Rights available.
Already in Spanish,
English and Turkish.

INFECTIOUS BURSAL DISEASE

MAIN CHALLENGES IN POULTRY FARMING

In this comprehensive review of infectious bursal disease, the author uses graphic resources accompanied by short texts to describe the disease in an accessible manner. The information provided in this handbook will allow professionals to deal with this disease more effectively.

Mohamed Faizal
Abdul-Careem

2014 / 80 pages / 17 × 11 cm
Softcover, wire-o / EN/ES

ISBN: 978-84-16315-01-7

RRP: €30 / w/o VAT: €28.85

Rights available.
Already in Spanish,
English and Turkish.

MAREK'S DISEASE

MAIN CHALLENGES IN POULTRY FARMING

Marek's disease is a severe and widespread avian condition which requires veterinary professionals to be constantly informed of the latest research available. In this book, the author, a specialist in this field, carries out a thorough and instructive review of this topic, which will be of great help to avian veterinary surgeons.

Kang-Seuk Choi

2014 / 74 pages / 17 × 11 cm
Softcover, wire-o / EN / ES

ISBN: 978-84-942775-1-1
Ref.: LIBR0465 / P45590

RRP: €30 / w/o VAT: €28.85

Rights available.
Already in Spanish,
English and Turkish.

NEWCASTLE DISEASE

MAIN CHALLENGES IN POULTRY FARMING

Updated review of Newcastle disease presented in a visual and practical manner. The chapter dedicated to the clinical diagnosis of the disease will surely be of great interest to the reader. Vaccination section provides the main guidelines to prevent vaccine failures and control the immunological status of the operation.
