Anatomy

Grant's Atlas of Anatomy, International Edition

16th Edition

by **Anne M. R. Agur & Arthur F. Dalley**

ISBN: 978-1-9751-9344-7 / 896pp / February 2024

For more than 75 years, **Grant's Atlas of Anatomy** has maintained a tradition of excellence while continually adapting to meet the needs of each generation of students. The updated 16th edition is a visually stunning reference that delivers the accuracy, pedagogy, and clinical relevance expected of this classic atlas, with new and enhanced features that make it even more practical and user-friendly.

Illustrations drawn from real specimens, presented in surface-to-deep dissection sequence, set this book-only version of **Grant's Atlas of Anatomy** apart as the most accurate reference available for learning human anatomy. These realistic representations bring structures to life and provide students with the ultimate lab resource.

Grant's Dissector

18th Edition

by **Alan J. Detton**

ISBN: 978-1-9751-9367-6 / 352pp / February 2024

A go-to dissection resource for generations, **Grant's Dissector, 18th Edition**, provides comprehensive, step-by-step guidance for the dissection of the human cadaver, empowering users to recognize important anatomic relationships and ensure successful outcomes in the anatomy lab. This updated 18th Edition is easy to use and exhaustive in scope, offering the perfect balance of foundational coverage and the latest approaches to broaden your understanding of key dissection procedures and ready you for success in healthcare practice.

Grant's Dissection Video Collection

Designed to support and enhance anatomy education across healthcare programs

Grant's Dissection Videos are a collection of 77 high-resolution videos, totaling more than 14 hours, that demonstrate the Grant's method of cadaver dissection sequences, as described in the renowned Grant's Dissector text.

Organized by body region, each video includes narration by Dr. Alan Detton and on-screen labeling showing students:

- What they are expected to achieve in lab
- The steps required for each dissection
- The information they need to learn for practical exam

Why Grant's Dissection Videos?

- **Ideal for preparation and review** in the gross anatomy lab environment
- **Real cadaver specimens** provide the anatomical detail students need to recognize important relationships revealed through dissection
- **Shows students the proper steps** for dissections and the information they need to learn for practical exams
- **Enables independent learning** and frequent viewing by students
- **Greatly improves student confidence** and makes their use of lab time more efficient
- **Benefits students** that do not have access to a dissection lab, or have limited time or access
- **When combining Grant's resources** – including Grant's Atlas of Anatomy and Grant's Dissector – both faculty and students have a consistent presentation and sequence that will allow for a deeper and more meaningful understanding of anatomy

- **Searchable by video title and description**, making it easy to get to relevant content
- **Variable video play speeds** (.5x, 1x, 1.5x, 2x) allow users to view or review at a comfortable pace
- **Video picture-in-picture** enables users to view a video while browsing additional content
- **Related video gallery** enables viewers to easily move throughout anatomically related videos
- **Key video segments** are listed and linked so viewers can access content quickly
- **Durable URLs** allow faculty to embed links into syllabi
- **On-demand usage** reporting available through Adobe Analytics
- **Contains clear narration**, on-screen labeling including captions in Spanish

Grant's Dissection Video Collection

Contents

1. BACK

- 1.1. Skin and Superficial Fascia of the Back (08:18)
- 1.2. Superficial Muscles of the Back (09:20)
- 1.3. Intermediate and Deep Muscles of the Back (09:55)
- 1.4. Suboccipital Region (03:44)
- 1.5. Vertebral Canal, Spinal Cord, and Meninges (11:27)

2. UPPER LIMB

- 2.1. Shoulder Region and Posterior Arm (12:46)
- 2.2. Pectoral Region and Superficial Fascia of the Upper Limb (13:03)
- 2.3. Female Pectoral Region and Breast (06:01)
- 2.4. Muscles of the Pectoral Region (08:20)
- 2.5. Axilla (16:10)
- 2.6. Arm (Brachium) and Cubital Fossa (13:35)
- 2.7. Flexor Region of the Forearm (16:19)
- 2.8. Palm of the Hand (19:23)
- 2.9. Extensor Region of the Forearm and Dorsum of the Hand (11:20)
- 2.10. Joints of the Upper Limb (18:55)

3. THORAX

- 3.1. Intercostal Space and Intercostal Muscles (06:38)
- 3.2. Anterior Thoracic Wall and Pleural Cavities (11:15)
- 3.3. Lungs (11:47)
- 3.4. Mediastinum (12:32)
- 3.5. External Features of the Heart (12:21)
- 3.6. Internal Features of the Heart (13:50)
- 3.7. Superior Mediastinum (07:50)
- 3.8. Posterior Mediastinum (09:39)

4. ABDOMEN

- 4.1. Superficial Fascia of the Anterolateral Abdominal Wall (06:48)
- 4.2. Muscles of the Anterolateral Abdominal Wall (20:15)
- 4.3. Reflection of the Abdominal Wall (08:42)
- 4.4. Peritoneum and Peritoneal Cavity (13:37)
- 4.5. Celiac Trunk, Stomach, Spleen, Liver, and Gallbladder (19:48)
- 4.6. Superior Mesenteric Artery and Small Intestine (08:46)
- 4.7. Inferior Mesenteric Artery and Large Intestine (07:43)
- 4.8. Duodenum, Pancreas, and Hepatic Portal Vein (08:50)
- 4.9. Removal of the Gastrointestinal Tract (11:28)
- 4.10. Posterior Abdominal Viscera (15:14)
- 4.11. Posterior Abdominal Wall (09:58)
- 4.12. Diaphragm (06:47)

5. PELVIS AND PERINEUM

- 5.1. Anal Triangle (07:49)
- 5.2. Male External Genitalia and Perineum (07:16)
- 5.3. Male Urogenital Triangle (14:54)

- 5.4. Male Pelvic Cavity (12:15)
- 5.5. Male Urinary Bladder, Rectum, and Anal Canal (07:19)
- 5.6. Male Internal Iliac Artery and Sacral Plexus (11:13)
- 5.7. Male Pelvic Diaphragm (05:53)
- 5.8. Female External Genitalia, Urogenital Triangle, and Perineum (11:16)
- 5.9. Female Pelvic Cavity (16:19)
- 5.10. Female Urinary Bladder, Rectum, and Anal Canal (07:31)
- 5.11. Female Internal Iliac Artery and Sacral Plexus (12:08)
- 5.12. Female Pelvic Diaphragm (05:34)

6. LOWER LIMB

- 6.1. Superficial Fascia of the Lower Limb (14:13)
- 6.2. Anterior Compartment of the Thigh (18:56)
- 6.3. Medial Compartment of the Thigh (07:10)
- 6.4. Gluteal Region (10:51)
- 6.5. Posterior Compartment of the Thigh and Popliteal Fossa (09:58)
- 6.6. Posterior Compartment of the Leg (08:10)
- 6.7. Lateral Compartment of the Leg (03:48)
- 6.8. Anterior Compartment of the Leg and Dorsum of the Foot (10:20)
- 6.9. Sole of the Foot (14:26)
- 6.10. Joints of the Lower Limb (21:45)

7. HEAD AND NECK

- 7.1. Superficial Neck (07:59)
- 7.2. Anterior Triangle of the Neck (19:53)
- 7.3. Thyroid and Parathyroid Glands (04:27)
- 7.4. Root of the Neck (12:18)
- 7.5. Face (17:10)
- 7.6. Parotid Region (06:37)
- 7.7. Scalp (05:07)
- 7.8. Temporal and Infratemporal Regions (18:39)
- 7.9. Interior of the Skull (10:40)
- 7.10. Brain Removal, Dural Infoldings, and Dural Venous Sinuses (08:55)
- 7.11. Gross Anatomy of the Brain (09:23)
- 7.12. Cranial Fossae (12:21)
- 7.13. Orbit (20:10)
- 7.14. Disarticulation of the Head (07:45)
- 7.15. Pharynx (14:07)
- 7.16. Nose and Nasal Cavity (07:42)
- 7.17. Palate and Pterygopalatine Fossa (12:39)
- 7.18. Oral Region (10:04)
- 7.19. Larynx (08:05)
- 7.20. Ear (05:29)

Anatomy

Grant's Dissection Videos

1st Edition

by **Alan J. Detton**

ISBN: 978-1-49631-918-0 / August 2017

This collection of approximately 80 high-resolution videos, totalling more than 13 hours, demonstrate the Grant's method of cadaver dissection sequences, as described in Grant's Dissector. Organized by body region, each video includes narration by Dr. Alan Detton and on-screen labelling and text. The videos show students what they are expected to achieve in lab, the steps required for each dissection, and the information they need to learn for practical exams.

Grant's Anatomy Coloring Book

1st Edition

by **Nicole R. Herring**

ISBN: 978-1-4963-5125-8 / 384pp / April 2018

Grant's Anatomy Coloring Book uses an interactive approach to help students deepen and reinforce their anatomical knowledge. Integrating visual and kinesthetic learning activities with an efficient, high-yield review of essential information, it's the perfect way for students to deepen their grasp of the anatomy they need to know for their courses, labs, and exams!

Anatomy

*Moore's Clinically Oriented Anatomy, International Edition, Revised Reprint**

9th Edition

by **Anne M. R. Agur & Arthur F. Dalley**

ISBN: 978-1-9752-0955-1 / 1200pp / March 2023

Renowned for its comprehensive coverage and engaging, storytelling approach, the bestselling **Moore's Clinically Oriented Anatomy, Ninth Edition** guides students from initial anatomy and foundational science courses through clinical training and practice. A popular resource for a variety of programs, this proven text serves as a complete reference, emphasizing anatomy that is important in physical diagnosis for primary care, interpretation of diagnostic imaging, and understanding the anatomical basis of emergency medicine and general surgery. The Ninth Edition reflects the latest changes in the clinical application of anatomy as well as preparation for the USMLE while maintaining the highest standards for scientific and clinical accuracy.

*Also available as a Print and Digital Access Card Package: 978-1-9752-1539-2

*Moore's Essential Clinical Anatomy, International Edition**

7th Edition

by **Anne M. R. Agur & Arthur F. Dalley**

ISBN: 978-1-9751-7430-9 / 736pp / January 2023

Known for its hallmark Clinical Blue Boxes, **Moore's Essential Clinical Anatomy, 7th Edition**, combines an easy-to-read approach, dynamic surface anatomy and medical imaging features, and engaging digital resources to build clinical confidence and equip users for success from foundational science courses through clinical training and practice.

The concise, user-friendly format emphasizes structures and functions critical to physical diagnosis for primary care, interpretation of diagnostic imaging, and understanding the anatomical basis of emergency medicine and general surgery.

*Also available as a Print and Digital Access Card Package: 978-1-9752-1512-5

Anatomy

Lippincott Illustrated Reviews: Anatomy, International Edition

1st Edition

by **Kelly M. Harrell & Ronald W. Dudek**

ISBN: 978-1-4963-8842-1 / 512pp / November 2018

New to the series, **Lippincott® Illustrated Reviews: Anatomy** equips students with a clear, cohesive understanding of clinical anatomy, accentuated with embryology and histology content to ensure their readiness for clinical challenges.

The popular Lippincott® Illustrated Reviews series format integrates approachable, lecture-style outlines with detailed full-colour illustrations and photographs to clarify complex information and help students visualize key anatomic structures. Accompanying clinical examples make content even more accessible, and board-style review questions build test-taking confidence to help students excel on their exams.

*Photographic Atlas of Anatomy, International Edition**

9th Edition

by **Johannes W. Rohen, Chichiro Yokochi & Elke Lütjen-Drecol**

ISBN: 978-1-9751-5156-0 / 752pp / March 2021

Photographic Atlas of Anatomy features outstanding full-colour photographs of actual cadaver dissections, with accompanying schematic drawings and diagnostic images, to help students develop an unparalleled mastery of human anatomy with ease. Depicting anatomic structures more realistically than illustrations in traditional atlases, this proven resource shows students exactly what they will see in the dissection lab. Chapters are organized by region in the order of a typical dissection, with each chapter presenting regional anatomical structures in a systematic manner.

This updated Ninth Edition includes revised content throughout and features additional cadaver dissection photos, medical imaging, and clinical illustrations, as well as a new appendix with learning resources that strengthen students' understanding of the vascular, lymphatic, muscular, and nervous systems.

*Also available as a Print and Digital Access Card Package: 978-1-9752-2993-1

Anatomy

Snell's Clinical Anatomy by Regions

11th Edition

by **Lawrence E. Wineski**

ISBN: 978-1-9751-9409-3 / 816pp / March 2024

Praised for its clear and consistent organization, approachable illustrations, and emphasis on clinical applications, ***Snell's Clinical Anatomy by Regions, 11th Edition***, pairs expert perspectives with engaging features for a proven learning and teaching resource on the practical application of anatomy.

The ideal resource for medical and related health professions programs, this trusted text guides students through the fundamentals of human anatomy, details the how and why behind each structure, and delivers the hands-on support essential to sound clinical choices.

Essential Ultrasound Anatomy

1st Edition

by **Marios Loukas & Danny Burns**

ISBN: 978-1-4963-8353-2 / 320pp / April 2019

Presenting sonography in the context of anatomy and clinical practice, ***Essential Ultrasound Anatomy*** offers practical, comprehensive coverage of the ultrasound images and important structures that are most frequently encountered in daily practice. Using concise text, ultrasound images with corresponding cadaver photographs, full-colour anatomical and technique illustrations, and videos, it provides today's students with a solid foundation in regional ultrasound anatomy.

Anatomy

BRS Gross Anatomy, International Edition

10th Edition

by **Nancy L. Halliday & Harold M. Chung**

ISBN: 978-1-9751-8148-2 / 544pp / January 2022

BRS Gross Anatomy, 10th Edition, presents the essentials of human anatomy in the popular Board Review Series outline format to help students master key information and confidently prepare for basic sciences level anatomy exams and the USMLE Step 1 board exam. Praised by students as the best review book for gross anatomy, this powerful, easy-to-use resource combines clear, concise writing, a clinically relevant approach, engaging radiographs and full-color illustrations, and more than 550 board-style review questions to ensure unparalleled exam preparation and position users for a successful transition to clinical practice.

Embryology

Langman's Medical Embryology, International Edition

15th Edition

by **T. W. Sadler**

ISBN: 978-1-9751-8001-0 / 472pp / January 2023

Concise, clearly written, and vibrantly illustrated, **Langman's Medical Embryology, 15th Edition**, makes complex embryology concepts approachable to help you build the clinical understanding essential to your success in medical practice, nursing, or other health professions. Hundreds of full-color illustrations clarify the stages of embryonic development with rich detail, and engaging learning features, clinical examples, and online review questions ready you for the challenges ahead on your exams and in clinical practice.

Acland's Video Atlas of Human Anatomy

Acland's Video Atlas of Human Anatomy is the optimal anatomical learning solution. Watch and listen to world- renowned anatomist Dr. Robert Acland—Professor Emeritus of Surgery, University of Louisville School of Medicine—as he shows and explains anatomical movement within each region of the body covering bones, muscles, tendons, organs, and more.

Available online, this atlas is a perfect resource for any institution's residents, faculty and students within medical, nursing, physician assistant, physical/occupational therapy, speech/language, and dentistry programs. *Acland's Video Atlas of Human Anatomy* provides foundational information to supplement the learning and teaching they receive in the classroom and in practice.

Why Acland's Video Atlas of Human Anatomy?

- Supports the teaching and learning of anatomy with more than 300 narrated videos
- Includes upper extremity, lower extremity, trunk, head & neck, and internal organs; plus, brand new groundbreaking inner ear content
- Allows students independent, frequent viewing for review, self-assessment, and practical exam preparation—as well as tracking their performance using interactive Q&A and timed or review quizzes
- Demonstrates muscle function in 3D to colleagues, staff, and patients
- Ability to browse video clips, share with colleagues, and add to a “favorites” area for quick reference
- Enables downloading of PDF transcripts for use in teaching guides and patient handouts

3D Rotational Gross Anatomy Videos Featuring Real Cadaver Specimens

- Comprehensive 3D video atlas of fresh anatomic specimens in their natural color
- Ideal for preparation and review in human gross anatomy courses and lab environment
- 360 view of specimens accompanied by clear narration and labeled structures
- Quick navigation to desired sections by region or via A-Z index
- Choose between complete 5-volume collection or specific body region
- Available online and optimized for mobile devices

Acland's Video Atlas of Human Anatomy

5-Volume Gross Anatomy Videos

These gross anatomy videos are comprised of 5 volumes, organized by region. Each volume offers in-depth coverage of the bones, joints, muscles, and more. This online resource also offers material to support student and faculty learning and teaching structure identification including self-assessment/Q&A, PDF transcripts of the videos used for handouts, and more.

Volume 1: Upper Extremity

- Shoulder
- Arm & Forearm
- Hand

Volume 2: Lower Extremity

- Hip
- Knee
- Leg & Ankle
- Foot

Volume 3: Trunk

- Spine
- Musculoskeletal Structures of the Thorax
- Musculoskeletal Structures Around the Abdomen
- Musculoskeletal Structures of the Pelvis

Volume 4: Head & Neck

- Support & Movement of the Head
- Facial Skeleton & the Base of Skull
- Nasal Cavity & Surroundings
- Oral Cavity & Surroundings
- Larynx & Surroundings
- Facial Muscles & Scalp
- Brain & Surroundings
- Nerves of the Head & Neck
- Blood Vessels of the Head & Neck
- Eye & Surroundings
- Ear—new Inner Ear content

Volume 5: Internal Organs

- Thoracic Organs
- Abdominal Organs
- Reproductive System

Histology

Atlas of Histology with Functional Correlations, International Edition

13th Edition

by **Victor P. Eroschenko**

ISBN: 978-1-4963-1023-1 / Approx. 617pp / March 2017

Master histology with idealized and actual photomicrography! This **Thirteenth Edition of Atlas of Histology with Functional Correlations** (formerly diFiore's) provides a rich understanding of the basic histology concepts that medical and allied health students need to know. Realistic, full-color illustrations as well as actual photomicrographs of histologic structures are complemented by concise discussions of their most important functional correlations.

Gartner & Hiatt's Atlas and Text of Histology, International Edition

8th Edition

by **Leslie P. Gartner & Lisa M.J. Lee**

ISBN: 978-1-9751-9203-7 / Approx. 608pp / April 2022

The go-to tool for mastering histology, **Gartner & Hiatt's Atlas and Text of Histology, Eighth Edition**, equips medical, dental, allied health, and biology students with a concise review of all of the major tissue classes and body systems in an engaging approach optimized for superior classroom and clinical success. A consistent presentation combines relevant text and detailed photomicrographs to facilitate understanding and provide valuable review for in-class and licensing examinations. Helpful explanatory text in each chapter details Histophysiology, Clinical Considerations, Summaries of Histologic Organization, and more, accompanied by more than 700 vivid, full-color, high-quality images.

Histology

Histology From a Clinical Perspective

2nd Edition

by **Dongmei Cui**

ISBN: 978-1-9751-5244-4 / 464pp / June 2022

Combining a complete histology atlas with a concise, clinically oriented text, ***Histology from a Clinical Perspective, Second Edition***, integrates essential basic science information and related pathology to ensure mastery of fundamental histology topics and the confidence to apply concepts effectively in practice. Explanatory text in each chapter is paired with expanded figure legends in an innovative layout that presents light and electron micrographic images of a tissue, a diagrammatic representation of the same tissue, and an example of how the tissue may be modified by a pathologic process in abundant Clinical Correlations. Rich with clinical vignette-style review questions and additional self-assessment resources, this student-friendly approach reflects the most up-to-date clinical perspectives and instills the understanding and skills to excel in today's clinical settings.

Histology

Histology: A Text and Atlas with Correlated Cell and Molecular Biology, International Edition

9th Edition

by **Wojciech Pawlina**

ISBN: 978-1-9751-8157-4 / 1104pp / October 2023

Combining a reader-friendly textbook and a rich, full-color atlas, this bestselling resource equips medical, dental, health professions, and undergraduate biology and cell biology students with a comprehensive grasp of the clinical and functional correlates of histology and a vivid understanding of the structural and functional details of cells, tissues, and organs.

Updated content throughout the text reflects the latest advances in cellular and molecular biology, accompanied by large, high-resolution illustrations and full-color photomicrographs that clarify microanatomy in vibrant detail. Ideal for integrated curriculums as well as standalone histology courses, this proven approach is accompanied by popular pedagogical features that distill complex information and help students save time.

Neuroanatomy

High Yield Neuroanatomy

5th Edition

by **Douglas J. Gould**

ISBN: 978-1-4511-9343-5 / 208pp / September 2015

Now significantly revised based on student feedback, this best-selling text provides a quick, authoritative review of the most important clinical aspects of neuroanatomy. A new, full-colour design highlights the essential information you need to know to excel on course exams and the USMLE Step 1. New objectives begin every chapter, contents have been reorganized and streamlined, and all information has been completely updated.

Neuroanatomy

Neuroanatomy Atlas in Clinical Context, Structures, Sections, Systems, and Syndromes, International Edition

10th Edition

by **Duane E. Haines**

ISBN: 978-1-9751-0668-3 / 384pp / September 2018

Neuroanatomy Atlas in Clinical Context is unique in integrating clinical information, correlations, and terminology with neuroanatomical concepts. It provides everything students need to not only master the anatomy of the central nervous system, but also understand its clinical relevance – ensuring preparedness for exams and clinical rotations. This authoritative approach, combined with salutary features such as full-colour stained sections, extensive cranial nerve cross-referencing, and systems neurobiology coverage, sustains the legacy of this legendary teaching and learning tool.

Neuroanatomy Atlas in Clinical Context, Structures, Sections, Systems, and Syndromes, International Edition

11th Edition

by **Duane E. Haines & M. Alissa Willis**

ISBN: 978-1-9751-9735-3 / 384pp / June 2024

Neuroanatomy

Barr's The Human Nervous System: An Anatomical Viewpoint

10th Edition

by **John Kiernan & Raj Rajakumar**

ISBN: 978-1-4511-7327-7 / 448pp / May 2013

This classic well-illustrated textbook simplifies neuroscience content to focus coverage on the essentials and helps students learn important neuroanatomical facts and definitions. Among its many distinctions are its organization by region and then pathways into and out of the nervous system, which permits students an integrated view of the anatomy and physiology; level of treatment suited to increasingly shorter neuroanatomy course hours for medical and allied health students; and the author's succinct writing style.

Essential Neuroscience

4th Edition

by **Allan Siegel & Hreday N. Sapru**

ISBN: 978-1-4963-8240-5 / 648pp / September 2018

Essential Neuroscience integrates must-have neuroscience information with clinical and physiological considerations to help readers master the fundamentals of neuroscience and prepare for board and course exams. Acclaimed for its concise, clinically relevant coverage, this student-friendly book uses a stepwise approach that starts with the basic building blocks of neural anatomy and expands to cover structures and functions, the interaction of systems, and the science of clinical disorders. A well-balanced mix of anatomy, physiology, biology, and biochemistry helps students increase their conceptual understanding of the subject matter and prepare for practice.

Neuroanatomy

Snell's Clinical Neuroanatomy

9th Edition

by **Ryan Splittgerber**

ISBN: 978-1-9751-9594-6 / 560pp / March 2024

Approachable in detail and rich with dynamic illustrations, ***Snell's Clinical Neuroanatomy, 9th Edition***, is your complete, clinically oriented introduction to neuroanatomy. This easy-to-use text is organized classically by body system, introducing basic components of the central nervous system and peripheral nervous system before moving on to more complex functions.

This revised and enhanced 9th Edition reflects the latest clinical approaches to neuroanatomy structures and reinforces concepts with enhanced illustrations, diagnostic images, and surface anatomy photographs. Each chapter begins with clear objectives and a clinical case for a practical introduction to key concepts. Throughout the text, Clinical Notes highlight important clinical considerations. Chapters end with bulleted key concepts, along with clinical problem solving cases and review questions that test students' comprehension and ensure preparation for clinical application.

Basic Clinical Neuroscience

3rd Edition

by **Paul A. Young, Paul H. Young & Daniel L. Tolbert**

ISBN: 978-1-4511-7329-1 / 464pp / February 2015

Basic Clinical Neuroscience, Third Edition, provides clear, detailed coverage of clinically oriented aspects of neuroanatomy and neurophysiology to help medical and health professions students better understand neurological and neurosurgical disorders and prepare for board exams. Through concise descriptions of functional systems, the book helps students understand the anatomic and pathophysiologic basis for neurologic abnormalities. Students have consistently praised the book for its exceptionally clear explanations of concepts. The Third Edition is enhanced by full colour illustrations, additional case studies, clinical images, review questions, and clinical correlations.

LWW Health Library Anatomical Sciences Collection

Why LWW Health Library?

Designed to support foundational learning and clinical practice, LWW Health Libraries deliver trusted health science education and clinical content to residents, fellows, program directors, faculty, and clinicians through a single portal — providing interactive online access to essential textbooks, multimedia & imagery, real-life case studies, and quizzes.

LWW Health Library: Anatomical Sciences helps students grasp fundamental concepts in human anatomy to better deliver patient outcomes. They'll get the guidance and support they'll need from basic science undergraduate coursework, residency training, and medical and allied health professional practice.

Textbook/Multimedia Toolbox for Teaching, Learning, and Practice

LWW Health Library Anatomical Sciences Collection Includes:

- **7 core textbooks** for the Anatomical Sciences student and practitioner (full list on reverse)
- **Over 100 videos** covering anatomy, osteopathy, biochemistry, and more
- **Over 1,000 self-assessment questions** for identifying areas where users need the most support
- **Dozens of case studies** offering real-world clinical scenarios
- **Content updated regularly!**
- **Key titles:** *Clinically Oriented Anatomy, Histology; A Text and Atlas with Correlated Cell and Molecular Biology, Langman's Medical Embryology.*

Key Features of LWW Health Library:

A single portal to foundational and basic sciences resources, as well as rich multimedia ancillaries for teaching, learning, and practice.

- **Highly-rated references:** Trusted, core texts from Lippincott Williams & Wilkins, making it a one-stop, digital portal for authoritative content paired with industry-leading functionality
- **Account personalization:** Ability to save content to a 'My Health Library', access Health Library from any computer, and set up email alerts for when new content is added
- **Quizzing:** Ability to create custom quizzes organized by topic and to keep track of responses and link to relevant content to help with remediation
- **Advanced semantic search:** Results displayed by title, chapter, topic, and/or type of resource
- **Responsive Design:** Ability to browse content on your computer, tablet, or smartphone with ease
- **Print/save a chapter:** Downloadable chapters via PDF, for easy access to content when offline — for note-taking or to print
- **Multimedia ancillary content:** Access to videos, images, Q & A, patient education handouts, and more

LWW Health Library Anatomical Sciences Collection

Authoritative content for the LWW Health Library Anatomical Sciences Collection includes:

- Agur & Dalley: *Grant's Atlas of Anatomy*
- Detton: *Grant's Dissector*
- Gartner: *Color Atlas and Text of Histology*
- Haines: *Neuroanatomy Atlas in Clinical Context*
- Moore, et al: *Clinically Oriented Anatomy*
- Ross & Pawlina: *Histology: A Text and Atlas: With Correlated Cell and Molecular Biology*
- Sadler: *Langman's Medical Embryology*.

Additional Features:

- **Regular content updates** that ensure users receive the most up-to-date reference material
- **Clean, user-friendly display** of book pages, including tables, images, and linked references
- **Multiple chapter views** including full chapter, figures only or tables only
- **Links to related content** in the collection for quick access, driven by powerful semantic tagging
- **Subject lists displayed** on textbook browse page for easy navigation, allowing users to filter by subject in search results
- **Images downloadable directly** into a PPT template

Who uses the LWW Health Library Anatomical Sciences Collection?

- *Students can access required readings and digital assets to prepare for class — easily jumping to specific chapters, with the ability to print and/or save that chapter to a PDF to read offline later.*
- *Instructors can use the contents and digital assets to create customized classroom materials and course packs — with the ability to save images, videos, and chapters and to search specific URLs and disseminate to students.*
- *Staff can use assessments and treatment information to plan care for patients.*

BioDigital Human

An immersive 3D anatomy solution that enriches teaching and learning about the human body

Understanding anatomy, including disease and treatment, is the foundation of all healthcare education. The BioDigital Human platform is a medically accurate, virtual map of the human body - composed of thousands of individually selectable anatomical structures, hundreds of simulated health conditions, and a powerful toolkit to map, visualize, and share 3D models. This fully embeddable, cloud-based software is available in eight languages, on any phone, tablet, laptop, computer, or in AR/VR for use within any educational or clinical workflow.

Developed with the goal of bringing the same interactive visualization used for maps and video games to education, the BioDigital Human platform is an interactive learning solution that includes full male and female anatomy, as well as health conditions and treatments. Each section is fully segmented, labeled, and dissectable for easy configuration to meet a variety of educational needs.

Key Features:

- Medically accurate male and female anatomy models composed of over 8,000 individually selectable objects
- 600+ disease and treatment 3D models to explore, including procedure animations
- Both full male and female anatomy included, in professional-grade detail
- Easy LMS integration that supports faculty and course learning objectives across an institution
- Cloud-based technology that allows quick, easy access from anywhere without having to download plug-ins or extensions
- 500+ interactive 3D quiz questions that can be used as is or modified by faculty to assess students or by students to create study guides (subscription model only)
- A powerful authoring tool allows users to adapt or create 3D models and 2D images
- Automatic syncing across devices
- Mobile app available for iPad®, iPhone®, and Android™ devices
- Enhance teaching materials with custom, innovative anatomy experiences that are easily added to any course.
- Create a collaborative team resource across your institution that teaches medical concepts through the power of 3D visualization.
- Develop virtual labs by recording lectures, prosections, dissections, and more, and combine them with interactive 3D learning activities, allowing students to revisit their lab experience, at any time and at their own pace.
- Available in English, Spanish, Chinese, French, German, Italian, Japanese, and Portuguese.

Lippincott®

Tailor 3D anatomy to your curriculum with BioDigital's Human Studio

- Create content aligned with educational objectives using powerful yet intuitive authoring tools.
- Hide structures to isolate essential anatomy and apply paint and effects to emphasize or de-emphasize structures.
- String together multiple views of the human body into an embeddable, 3D interactive slideshow.
- Add labels, titles, and descriptions or edit existing ones.
- Include questions or quizzing around models with multiple choice, anatomy selection, labeling, or instructions all in interactive 3D.

Go beyond anatomy with 3D condition and treatment models

Hundreds of diseases, conditions, and treatments, including heart disease, breast cancer, and diabetes, are presented in interactive 3D, allowing students to visualize complex science in a more accessible way.
